WFP ANNUAL PERFORMANCE REPORT 2018

EXECUTIVE BOARD BRIEFING | 18 APRIL 2019

INTRODUCTION

Annual Performance Report 1968 vs 2018

3 pages vs 80 pages

Generic overview of services that are provided vs in-depth evidence based reporting on WFP's reach and coverage

Summary of revised provisions and actual expenditures vs detailed analysis on financial resources, prioritization and consequences of funding gaps

(WFP	INTERGOVERNMENTAL COMMITTEE	Distr.: LIMITED
	PAM	COMITÉ INTERGOUVERNEMENTAL	WFP/IGC: 14/17 27 September 1968
	PMA	COMITÉ INTERGUBERNAMENTAL	

Fourteenth Session

Rome, 6 - 15 November 1968

Agenda item 16

ANNUAL REPORT ON BUDGETARY PERFORMANCE

Submission by the Executive Director

The Ad Hoc Committee of Experts to examine the Finances of the United Nations and the Specialized Agencies recommended that the heads of organizations should submit an annual report of budgetary performance and that these reports should be forwarded to Member Nations. Nembers of the IGC will recall that at the Tenth Session attention was Remover mations. Remover of the localitrecalitat at the form bosonion was drawn to the significance for MFP of the Second Report of the A<u>H</u> <u>oc</u> Committee of Xrperts and the request was made that, if the <u>AH</u> <u>Hoc</u> Committee's recommendations were approved, they should be applied as far as possible by the Executive Director, who should in due course report to the IGC on their implementation.²⁵

The Executive Director informed the members of the IGC at its Twelfth Session of 2. the Program's contribution of \$10,000 as its share of the total cost of the Inspection Unit in 1968. This figure should be considered as a tentative one, since the final distribution of costs, as cost-shared by all United Nations agencies, will be based on actual 1967 expenditures, which have not yet been assessed. The Program has also collaborated with the Consultative Committee on Administrative Questions (CCAQ) and contributed material to the 52 recommendations of the Ad Hoc Committee, indicating its position and action taken to date and what action is proposed to be taken on the recommendations and the timing thereof. In addition, the Program submitted its classification of expenditures in respect of 1965, 1966 and 1967 for the Administrative Committee on Coordination (ACC) Report to the Economic and Social Council of the UN (ECOSOC) during 1967 and, again, its classification of expenditures in repsect of 1966, 1967, and 1968 for the ACC report to ECOSOC during 1968.

3. This paper deals with the \underline{Ad} Hoc Committee's specific recommendation regarding proparation of the annual report of budgetary performance which is being submitted for з. the information of the IGC for the first time. It is concerned with the administrative budgetary performance for the year 1967 only and does not cover project budgets, a review of which is submitted to the Committee from time to time, when necessary. This report has been reviewed by the Advisory Committee on Administrative and Budgetary Questions (ACABQ) of the United Nations, and the Finance Committee of FAO, the reports of which are submitted separately.

4. The attached annex shows for 1967: (i) the <u>approved</u> budgetary provisions; (ii) the provisions <u>revised</u> by transfers between the various sections made by the Executive Director within the authority conferred on him by the WFP Additional Financial Procedures; and (iii) actual expenditures incurred. As required by the Additional Financial Procedures, the transfers are reported upon in a separate document.

1/Report of the Tenth Session (document WFP/IGC;10/23, paragraph 83).

Annual Performance Report for 2018

Draft Decision*

The Board approves the Annual Performance Report for 2018 (WFP/EB.N/2019/XX), noting that it provides a comprehensive record of WFP performance for the year. In accordance with General Regulation VL3, and pursuant to its decisions 2000/EB.A/2 and 2004/EB.A/11 and to ECOSOC's resolution E/2013/L17

and the FAO Council's decision at its 148th Session in 2013, the Board requests that the Annual Performance Report for 2018 be forwarded to ECOSOC and the FAO Council, along with the present decision and the Board's decisions and recommendations for 2018.

WFP Management Plan (2018-2020)

Executive summary

A new way of working

After a decade of decline, hunger is on the increase, with 815 million people suffering from chronic undernourishment, including more than 100 million facing severe food insecurity. Hunger and undernutrition are significantly worse in countries affected by conflict, which account for 60 percent of the world's undernourished population and nearly 80 percent of the world's stunted children. Conflict and hunger have contributed to a doubling in the number of internally displaced persons in 10 years. These are the stark realities in the area of WFP's core humanitarian work, where it has its largest operations.

Yet, for the people that WFP reaches, distinctions between humanitarian assistance, development support and peace building are meaningless. The current reality demands that WFP find new ways of working that enable it to deliver more efficiently, effectively and economically in support of host governments, within the United Nations system and with the private sector and civil society.

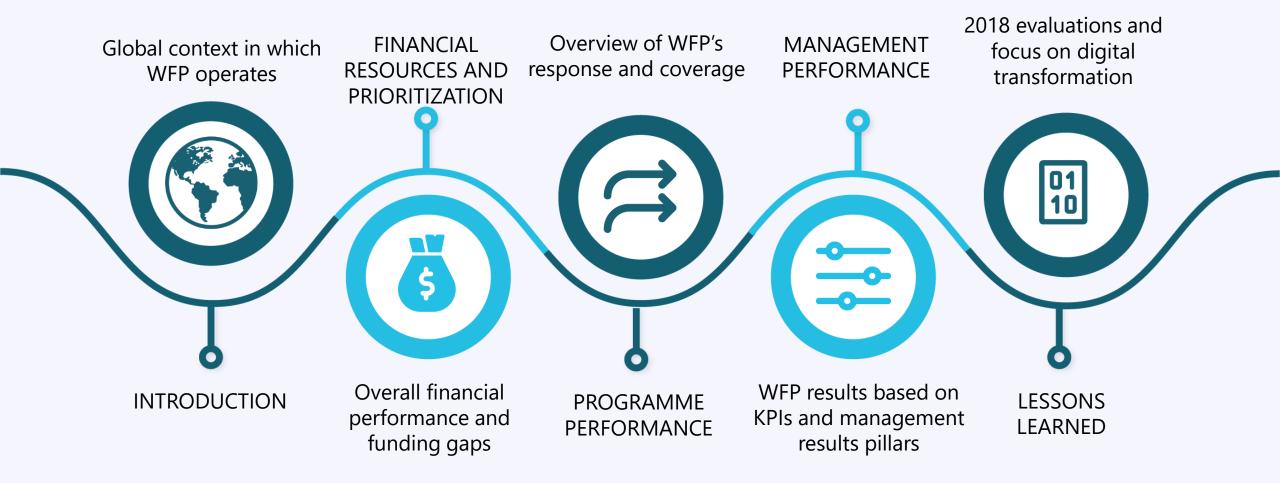

Food assistance is one of the most important areas of action and investment at the humanitariandevelopment-peace nexus. Extending well beyond handouts of food, food assistance comprises a comprehensive range of instruments, activities and platforms that together empower vulnerable and food insecure people and communities to obtain nutritious food in various contexts. Through the investments and reprioritizations in this 2018 Management Plan, WFP will continue to improve its food assistance operations through the progressive implementation of country strategic plans and transformed financial and corporate results frameworks; enhance its capabilities in respect of cash-based transfers; and improve its organizational risk management. Together, these initiatives will boost WFP's contributions to Sustainable Development Goal 2, on zero hunger, and the 2030 Agenda for Sustainable Development as a whole.

Structure of the report

Global context

COMPARED TO: 815M people in 2017

conflict climate change

emergencies manifested in

¹³ 7 L3s
¹² 9 L2s

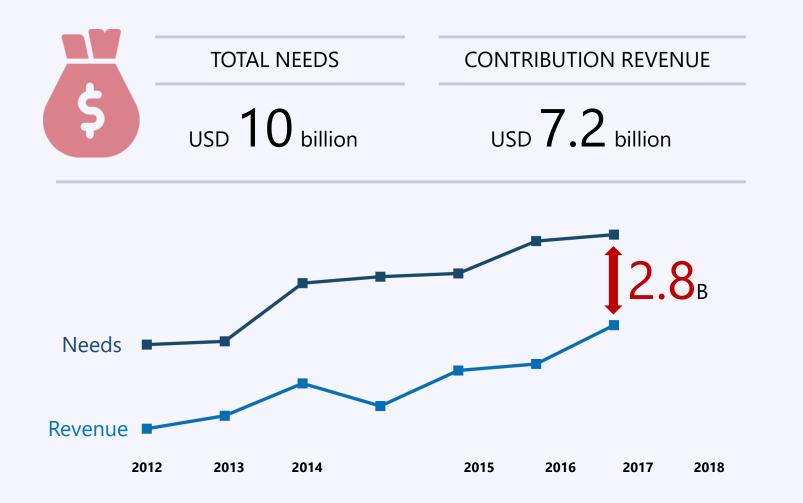

required a corporate or regional emergency response

COMPARED TO: 8 L3 and 7 L2 emergencies in 2017

Closer financial analysis

 Record level contributions of USD 7.2 billion compared to USD 6 billion in 2017.

 Funding gap stood at 2.8 billion which represents a significant improvement from the USD 3.8 billion gap in 2017.

• The top 10 donors accounted for almost 85% of the contribution revenue.

Funding gap consequences

- Countries focusing on capacity strengthening have been less well funded with a contribution revenue of USD 25M against a budget of USD 72.6M.
- Smaller operations with few or no direct deliveries have been less well funded compared to WFP's largest operations.

Low visibility protracted crises often face funding challenges which has caused WFP to cut rations to stretch available resources.

The Latin America and the Caribbean region had a 45% funding gap

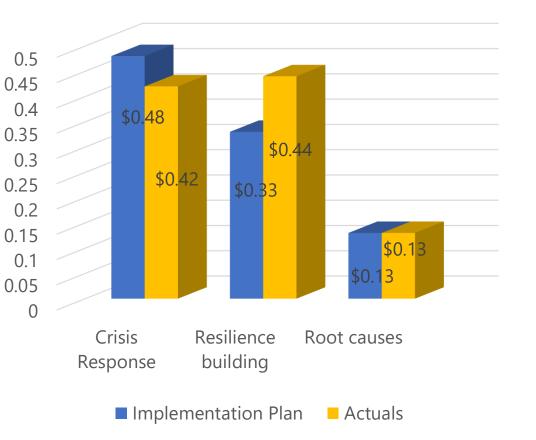

DPRK had the fourth largest funding gap and had to suspend food assistance to 195,000 kindergarten children

In Ethiopia WFP had to increase refugee ration cuts from 20 percent to 40 percent in May and June 2018 in order to stretch available resources

Cost per ration: Preliminary data

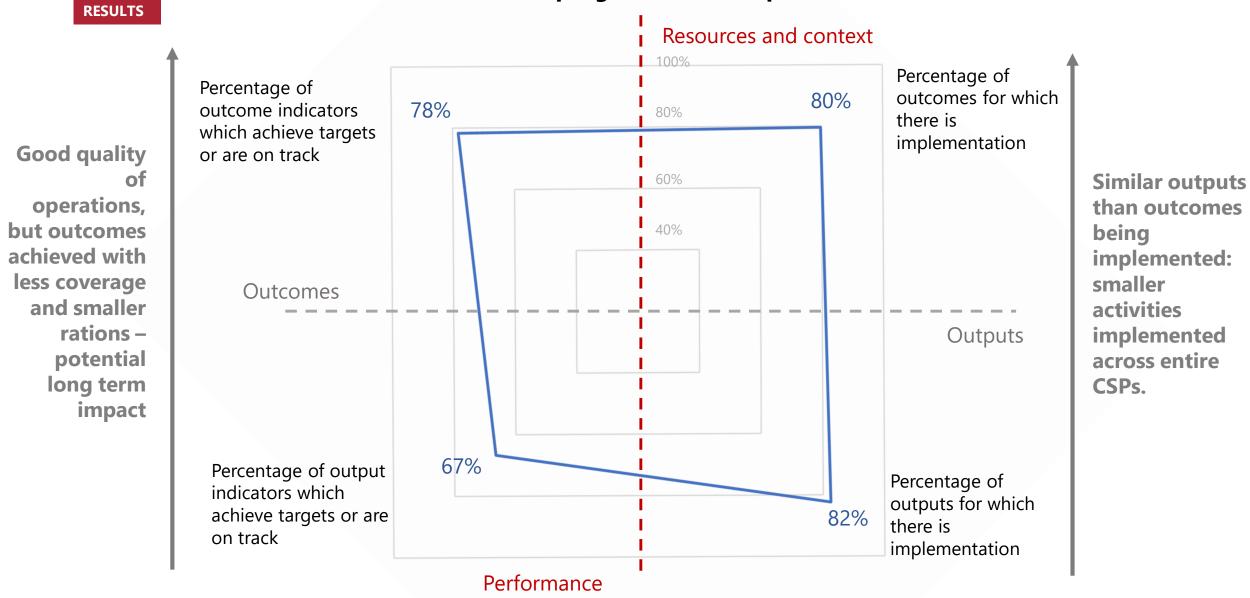

Actuals not very different from planned: Resilience higher, crisis response lower. Overall, 34 cents compared to 36 cents.

Average rations size 63% of the planned

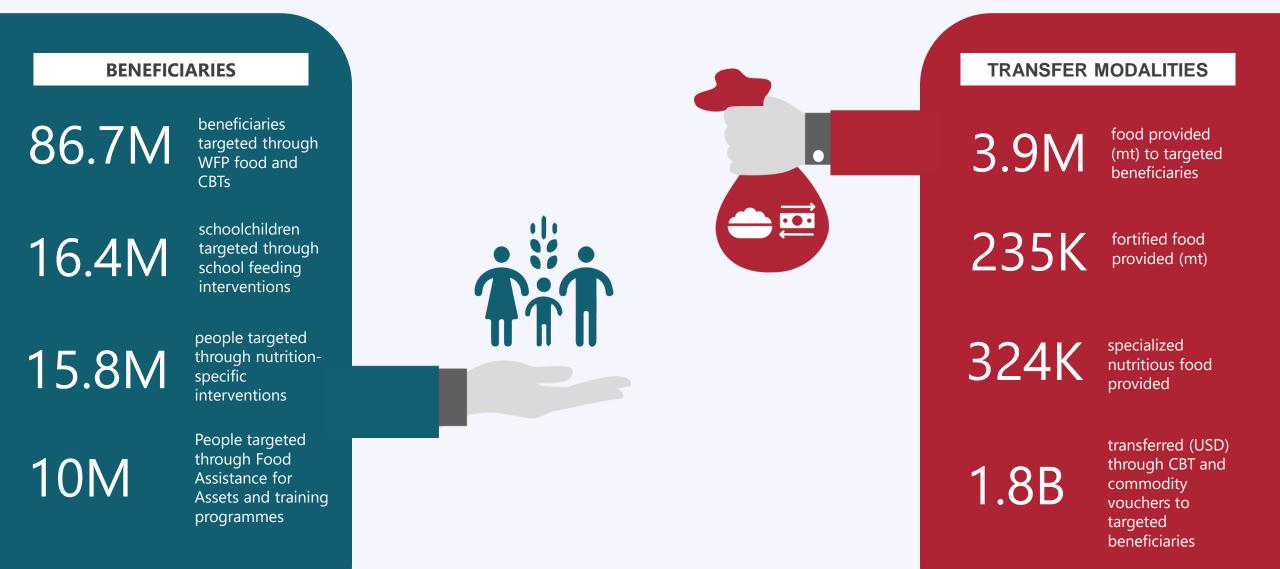

Cost per ration

KPI 1 – overall progress in CSP implementation

Reporting on corporate targets based on CRF discussions

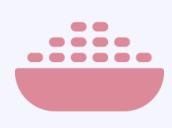

Key figures breakdown

School-feeding, nutrition and FFA in numbers

school-children provided with meals in 59 countries

3.2M

beneficiaries in L2 and L3 emergencies reached through school feeding programmes

15.8M (2018) 16.3 (2017)

12.8 (2016)

beneficiaries reached with nutrition-specific interventions compared to 16.3M in 2017

4.2M

people reached through nutrition messaging and counselling compared to 4M in 2017

10M (2018) 9.9 (2017) 10.5 (2016) people across 55 countries benefitted from WFP FFA programmes compared to 9.9M in 2017

531 asset locations analyzed by the Asset Monitoring System RESULTS

Focus on food assistance for assets outputs

Planned 4,277ha

Planned

Actual 4,000ha

of forest planted

Actual

11,572km 10,200km

Actual

53,500

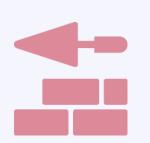

of feeder roads and trails constructed or repaired

Planned 66,835

> number of social/community infrastructure built or rehabilitated

Planned

Actual 129,063ha 122,500ha

> of farming and non-farming land rehabilitated or improved

Planned

166

Planned

3,412

Actual

179

bridges and culverts constructed or repaired

> Actual 3,000

Number of water points used for agriculture, livestock and/or fisheries built or rehabilitated

Focus on L3s: Bangladesh

Unconditional resource transfers provided to over 900,000 Rohingya refugees.

- 225,000 pregnant and lactating women and children aged 6-59 months of the host communities supported through prevention of moderate acute malnutrition (MAM) programme.
- Site maintenance and engineering projects initiated by WFP in coordination with UNHCR and IOM.

Focus on L3s: Sahel

Activated a pre-emptive L3 response the first in history – due to the forecast of a critical lean season with over 5.8 million food insecure people.

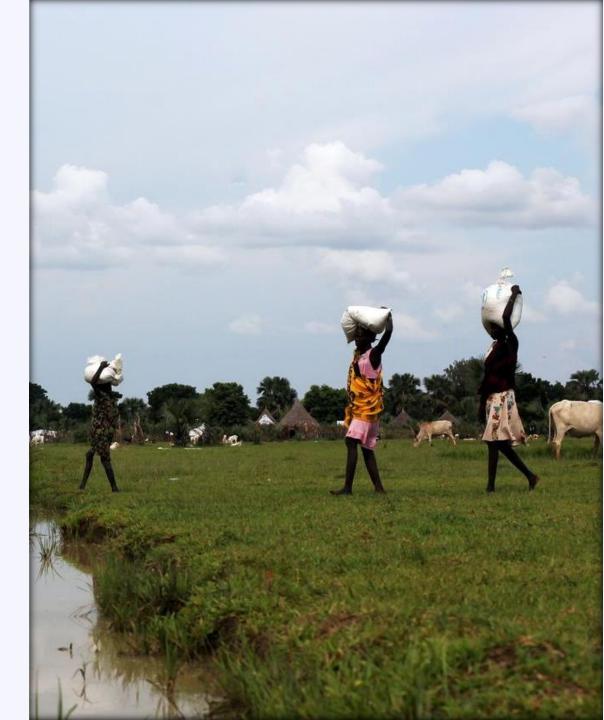

The emergency response included: unconditional food assistance through in-kind and CBT; and malnutrition prevention and treatment activities.

89% of the 3.5 million planned beneficiaries reached thanks to the activation of the pre-emptive L3 emergency and internal advance financing mechanisms

Focus on L3s: South Sudan

- 5.3 million beneficiaries reached in response to protracted conflict and ongoing economic crisis impacting 6.1 million people
- FFA and School Feeding programmes expanded to cover 40 percent more beneficiaries in FFA and 38 percent more schools in comparison to 2017. Retention rates for WFP-assisted schools saw positive results for both girls and boys, surpassing the target in all cases.
- 132,000 mt of commodities strategically prepositioned in 50 warehouses across the country.

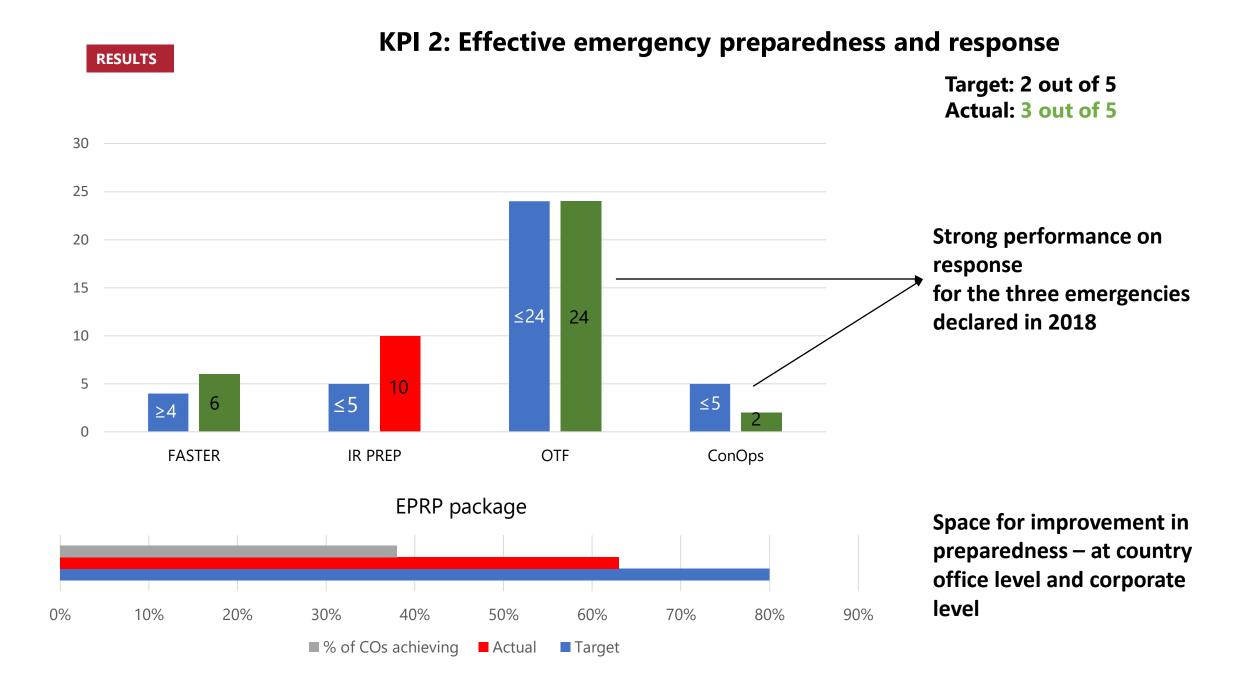

Focus on L3s: DRC

Scaled up food assistance in six L3 provinces to reach over 3.7 million people.

In coordination with partners reached 41,000 conflict-affected children in 74 schools through a home-grown school feeding programme.

Grappled with its second Ebola outbreak and provided logistical services and food assistance to more than 150,000 people.

Cross-cutting issues

ACCOUNTABILITY TO AFFECTED POPULATIONS

Complaints and feedback mechanisms piloted to provide basic programmatic information to beneficiaries. GENDER

P

Participation of 21 country offices in the Gender Transformation Programme.

PROTECTION

ENVIRONMENT

Distribution points in Bangladesh increased from four in late 2017 to 21 in 2018 and separate lines organized for women and girls 67% reported countries met targets for which environmental risks have been screened and, as required, mitigation actions identified.

SO1 End hunger by protecting access to food

SR1

Everyone has access to food

SDG target 2.1

- Majority of WFP's engagement in emergency response, safety nets, capacity strengthening and emergency preparedness.
- Over 3 million metric tonnes of food and approximately USD 1.2 billion in cash-based transfers were distributed in 2018.
- **80 percent** of beneficiaries in the Middle East, North Africa, Eastern Europe and Central Asia region under this SO.
- Most of operations making progress towards their targets.
- All indicators, except the food consumption score, on track or achieving their targets.
- Food consumption score made moderate progress and was hindered by conflict and funding shortfalls.

SR2

No one suffers from malnutrition

SDG target 2.2

- In 2018, MAM treatment outcome indicators recovery, default, non-response to treatment, and mortality rates - demonstrate a moderate overall performance.
- Challenges faced by MAM treatment programmes performance includes ongoing conflict, household distance to treatment centres, health clinic staffs' capacities, or resource constraints.
- Performance of stunting prevention activities varied.
- Minimum dietary diversity for women (MDD-W) is one of the indicators WFP uses to measure the performance of stunting prevention programmes. Overall, MDD-W indicator show improvement.
- Targets were not achieved in some areas for the other primary indicator WFP uses in its stunting prevention programming: proportion of children aged 6–23 months who consume a minimum acceptable diet (MAD).

SR3

Smallholders have improved food security and nutrition through improved productivity and incomes

SR4

Food systems are sustainable

SDG targets: 2.3 and 2.4

- Indicators demonstrate that WFP's 2018 interventions produced positive outcomes directly related to WFP activities' implementation. For example, **80 percent** of countries with the indicator "percentage of targeted smallholder farmers reporting increased production of nutritious crops" met their annual targets.
- WFP broadened the reach of its R4 Rural Resilience Initiative, increasing it by 60 percent from 2017. R4 reached over 87,000 farmers in six African countries with its integrated climate risk management approach, while approximately 6,000 farmers indirectly accessed R4 insurance products. This ensured 545,000 people were protected against the risk of drought.
- WFP commenced a new strategic partnership with the Green Climate Fund that will strengthen countries' access to climate finance. WFP supported Senegal, Tajikistan and Kyrgyzstan to mobilize approximately USD 28 million in climate funds to strengthen their food systems' resilience to climate change.

SO4 Support SDG implementation

SR5

Developing countries have a strengthened capacity to implement SDGs

SR6

Policies to support sustainable development are coherent

SDG target: 17.9 and 17.14

- Increasing numbers of WFP country offices engaging in South-South cooperation: **94 percent** of the CSPs approved in 2018 include South-South and triangular cooperation as a means for strengthening host government capacities to achieve SDG 2 targets.
- In 2018, **30 countries** were directly supported by WFP CoE to strengthen national capacities to implement the SDGs. Concrete outcomes from this capacity strengthening support enhanced **national school feeding programmes** policies, programmes, and system components
- WFP's work under this SO was not fully captured. Fewer than five country offices included relevant indicators in their log-frames, preventing WFP from conducting a broader institutional performance assessment.

SO5 Partner for SDG results

SR7

Developing countries access a range of financial resources for development investment

SR8

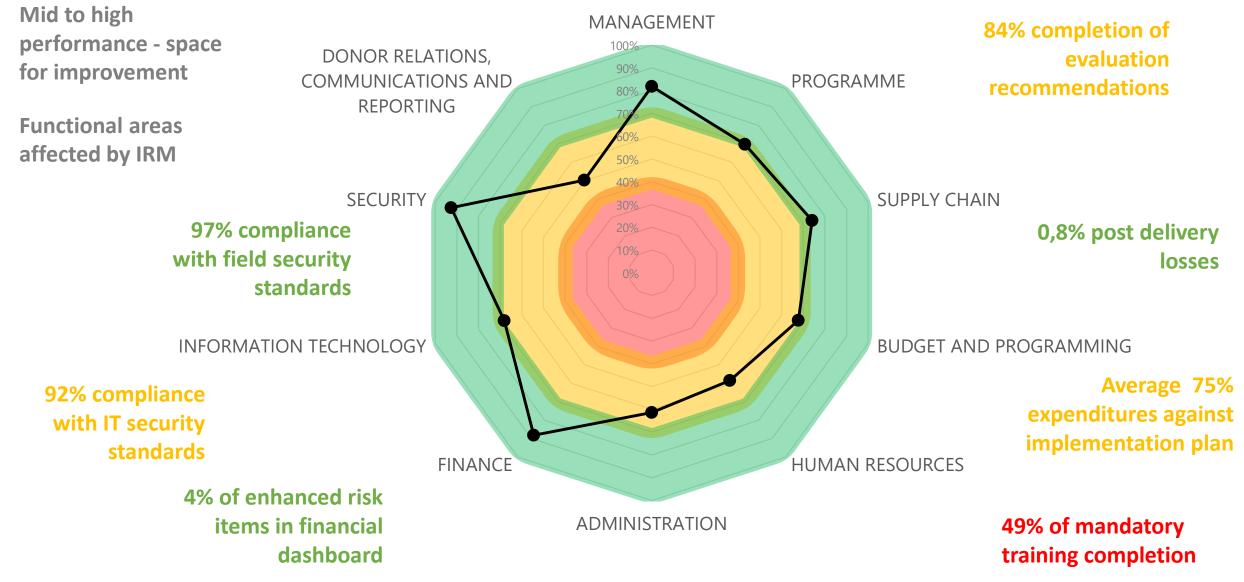

Sharing of knowledge, expertise and technology strengthen global partnership support to country efforts to achieve the SDGs

SDG target: 17.3 and 17.16

- The global IFRC-WFP National Society Capacity Strengthening Initiative's initial implementation began in four pilot countries: Burundi, Pakistan, Sudan and the Dominican Republic.
- WFP significantly contributed to the wider humanitarian community through common services provision. The WFP-led Logistics Cluster supported 606 organizations, of which 78 percent were NGOs. WFP also provided bilateral logistics services to 98 partners across 20 countries. In 2018, the United Nations Humanitarian Response Depot (UNHRD), managed by WFP, sent emergency relief items and equipment worth USD 58 million to 93 countries for 35 partner organizations.
- The WFP-managed United Nations Humanitarian Air Service (UNHAS) transported 386,330 passengers and 3,656 metric tonnes of items across 16 countries for more than 700 organizations, of which NGOs accounted for 55 percent.

KPI 3 – overall achievement of management performance standards

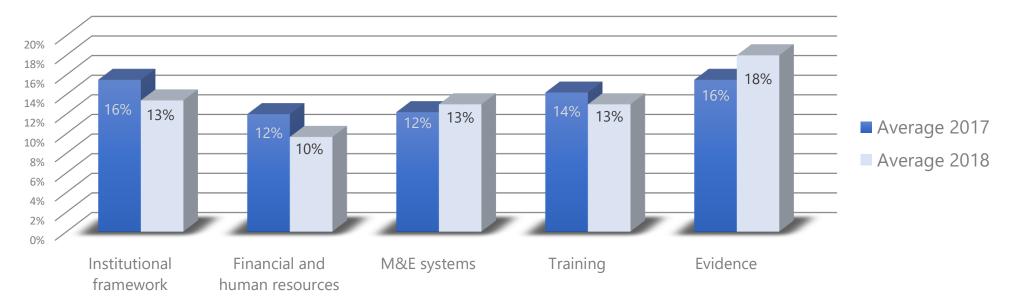

66% implementation of internal controls in admin

Pillar A: Strategy and Direction:

• Progress of the **implementation of the IRM:** transition continues as planned

 Progress on implementation of EB-approved policies: overall progress – strong areas training, monitoring of implementation and evidence. Weakest area, human and financial resources

Pillar D: Advocacy, partnerships and resource mobilisation

 Percentage of WFP-led clusters achieving targets: overall improvement – important improvement in protracted emergencies

Pillar E: Governance and independent oversight

- Number of audit recommendations
- % implementation of EB recommended actions

Increased oversight (more resources), Increased compliance with recommendations

Prevention of SEA and SHA					
76%	100%	36% - 16% - 47%			
Employees completing mandatory trainings in PSEA and PSHAP	% of PSEA investigations on substantiated cases on-going at 31 December	% of SH investigations on substantiated cases completed, on- going or to be started at 31 December			
Digitalization					
37%
