

WFP has a new policy on protection and accountability

It fits under the United Nations foundational pillars

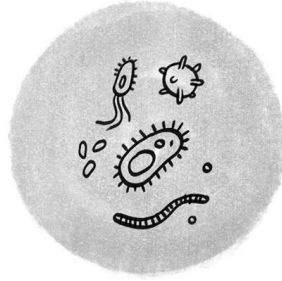

We will work with local people to understand  
who is most in danger and why

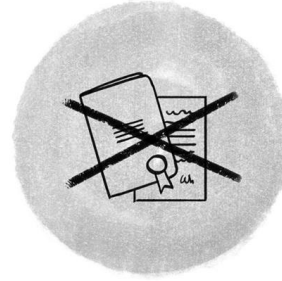

We will work with local people to understand  
how they are in danger

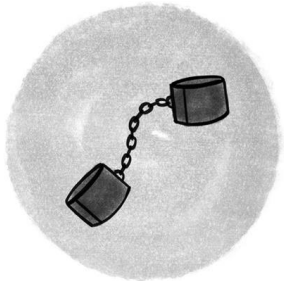

**CLIMATE  
CHANGE**

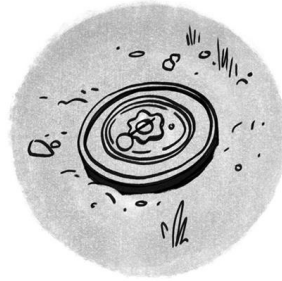

**HEALTH  
PANDEMICS**

**LIMITED ACCESSIBILITY  
TO INFORMATION**

**FORCED  
LABOUR**

**LANDMINES**

**MILITARY  
CONFLICT**

WFP will put affected populations at the center  
of decision-making

We will work with local people to understand how they can be safe when they get food assistance from us

How people want to get support and what is important to them

What the people we support are already doing to keep safe

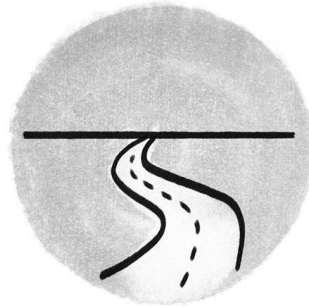

Who we should work with to keep people safe

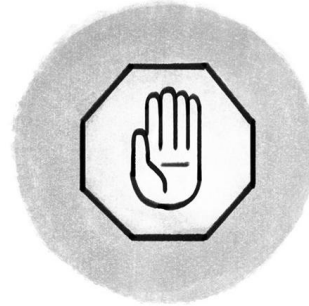

We will maintain protection across all programmes and operations

**MEANINGFUL  
ACCESS**

**ACCOUNTABILITY**

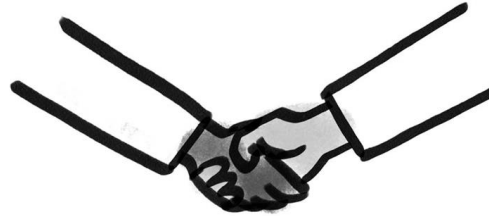

**AVOID CAUSING  
HARM**

**PARTICIPATION &  
EMPOWERMENT**

We must work with many actors  
to achieve successful protection outcomes
