WFP'S CONTRIBUTION TO STRATEGIC OUTCOMES

SO1 General Food Assistance - a vital lifesaving source for the most vulnerable refugees. High-quality implementation of Cash Based Transfers, provided a buffer against increasing food insecurity

SO2 Early indications: positive contribution to enhance National Aid Fund systems, improving quality of social protection for vulnerable Jordanians

Partnership with Ministry of Education to develop the National School Feeding Strategy (NSFS)

SO3 Less solid progress has been made in supporting a pathway toward sustainable livelihoods

SO4 Co-led the development of the National Food Security Strategy (NFSS)

CONCLUSIONS

The key strength has been sustaining General Food Assistance at scale

WFP provided capacity strengthening for national institutions and is working towards harmonized approaches

WFP has started to transition from unconditional cash assistance towards resilience, livelihoods, self-reliance, and more predictable social safety nets

Steps taken to increase the efficiency, effectiveness, and sustainability of operations, but monitoring and learning have not been systematic

RECOMMENDATIONS

- 1 Develop and monitor the next CSP based on a more integrated framework with a clearer focus on selected transformative dimensions
- 2 Ensure WFP has the necessary in-country expertise to match its ambitions
- 3 Use the existing platform for a coherent strategy to address external barriers to harmonization and transitioning to meet beneficiary needs in partnership with others
- 4 Enhance accountability to affected populations through inclusive community engagement and improved Complaint and Feedback Mechanisms
- 5 Support increased capacity strengthening for a national social protection system for vulnerable population groups
- 6 Continue the development of a dual livelihoods approach that works across the food security-water-climate change nexus and supports transition of refugees to self-reliance
