FOR **World Food** Programme

Somalia Joint Resilience Action

Mr Ahmed Dubow Keinan | Senior Resilience Advisor, Ministry of Agriculture & Irrigation, Somalia Mr Andrew John Lanyon | Resilience Coordinator, FAO, Somalia

SAVING LIVES CHANGING LIVES

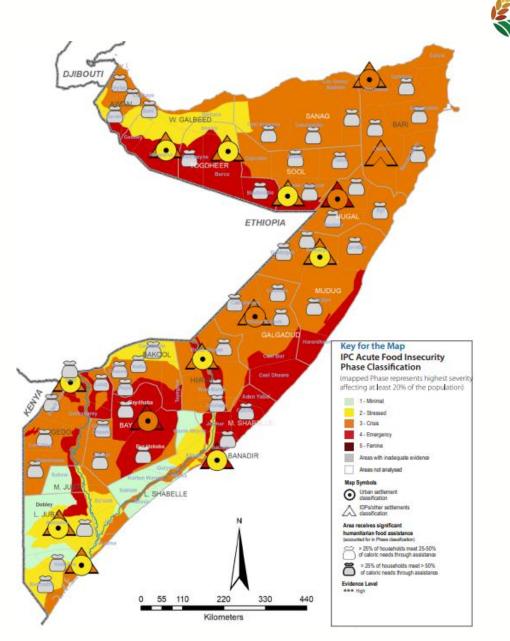

Food and Agriculture Organization of the United Nations

SITUATION OVERVIEW

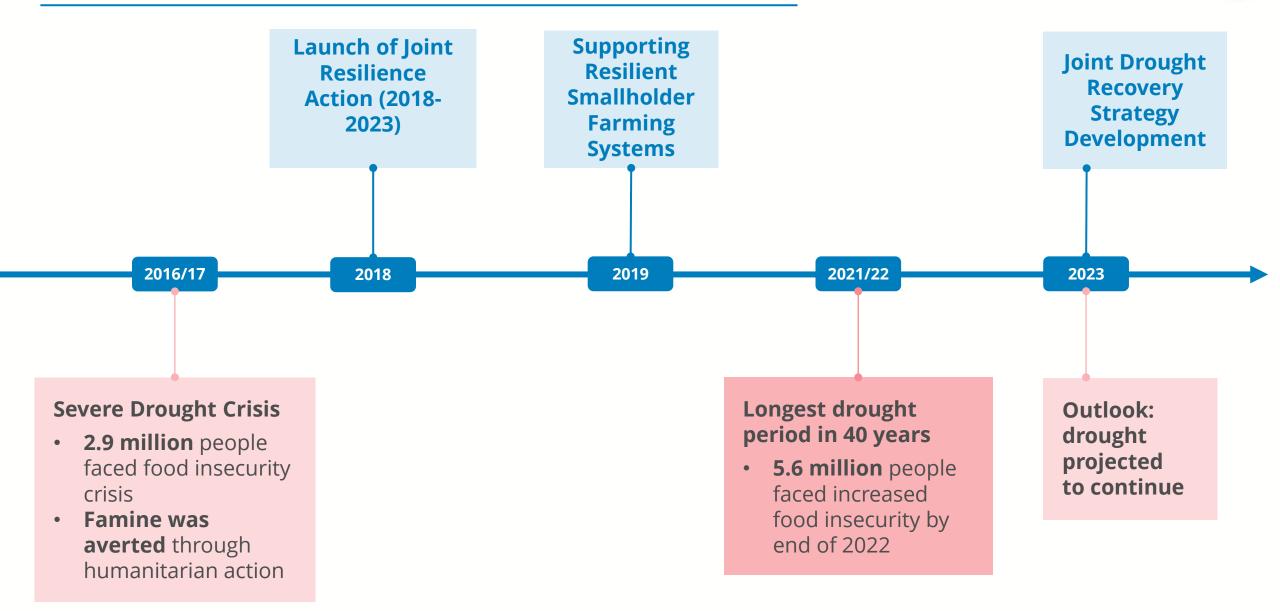

- Frequent and recurrent climate extremes, exacerbated by conflict
- Somalia has faced five consecutive failed rainy seasons
 - **Over 6 million** face crisis levels of food insecurity across the country
 - 322,000 on the brink of famine
- Although famine thresholds have not been met
 - **1.2 million** people displaced since January 2022
 - **1.5 million** children face acute malnutrition in 2022
 - **6.4 million** people have lack of access to safe water and sanitation
- Government & partners responses:
 - Large-scale emergency response in 2022/23
 - Resilience programmes adjusted according to emerging contexts

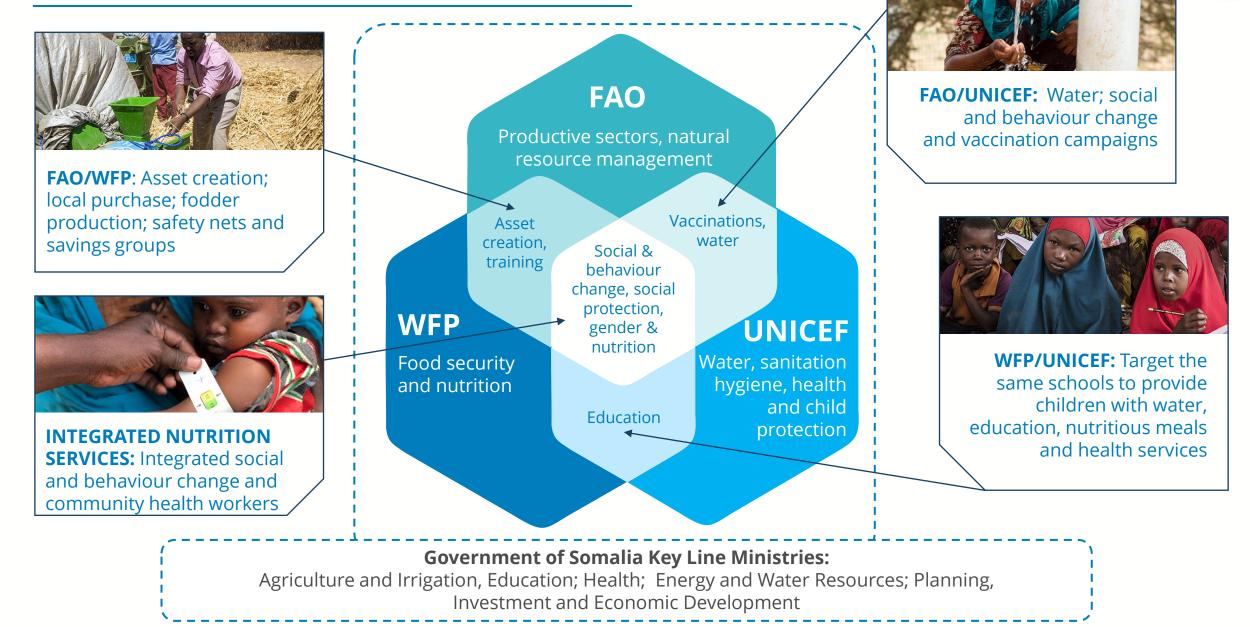

IPC food insecurity Jan – Mar 2023 projection

EVOLUTION OF THE RESILIENCE PARTNERSHIP

SOMALIA JOINT RESILIENCE ACTION

Improved nutrition

 Acute malnutrition rate in a targeted region dropped from 13.1% in 2018/2019 to 9.7% in 2022

Malnutrition prevention

- 100 treatment centers operating
- **307,000** children and **160,000** breastfeeding mothers treated

Higher levels of acceptable food consumption

Restored agricultural potential:
20% increase in maize and sorghum production

Reduction in school closures, increased retention rates

• Supported schools **remained open** during drought, **retaining 95% of** children enrolled

THE WAY FORWARD

*

Launch an integrated drought recovery programme

Scale up and expand partnerships and resilience programmes

Extend investments to enable durable solutions for IDPs

Invest in and align with Government's priorities and development plans

Thank you for your attention
