SAVING LIVES
CHANGING LIVES

Security incident trends in 2023

- Number of incidents plateaued since 2021.
- Major incidents decreased by 16%.
- Greater WFP exposure to major incidents.
- 10 employees suffered fatalities.

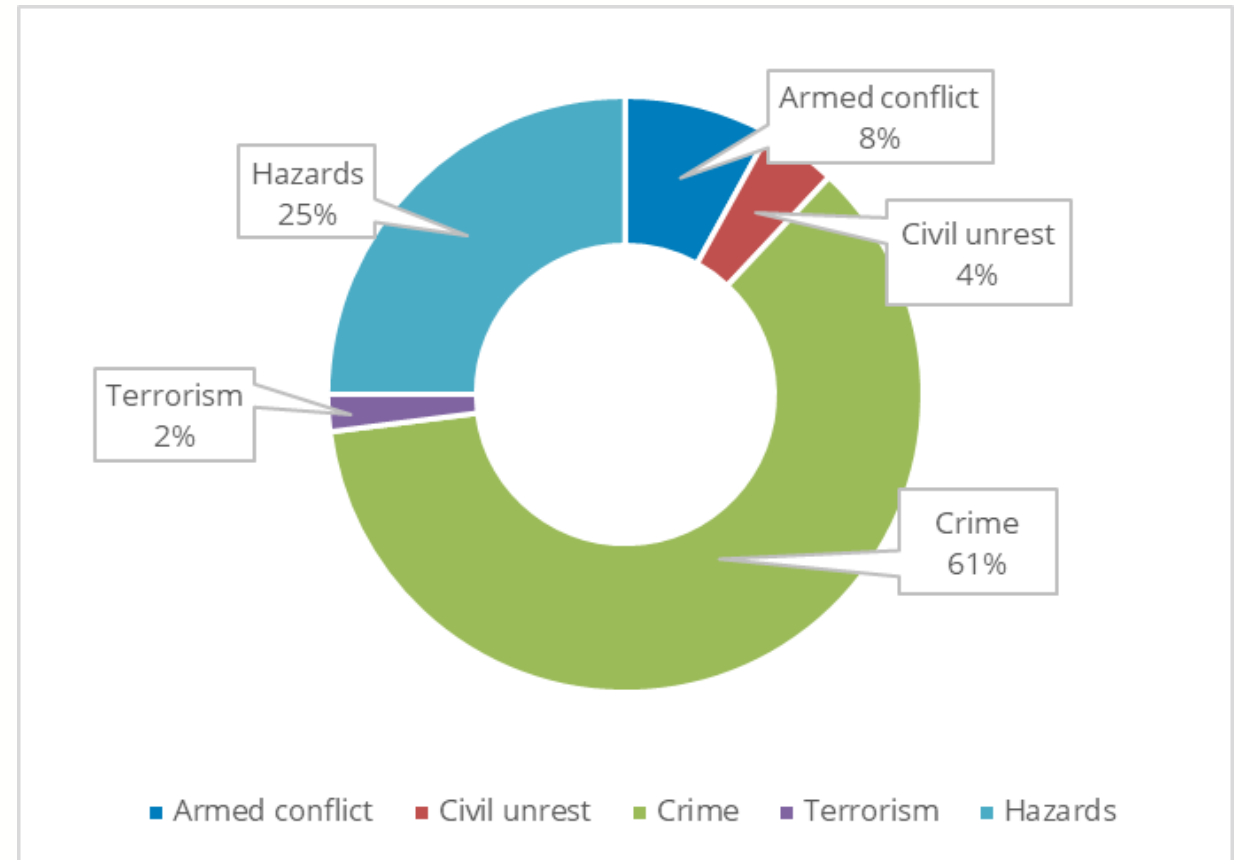

Incident patterns by threat type and region

Threat types:

- Crime was the most significant threat (61%).
- Hazards accounted for 25% of incidents.
- Armed conflict represented 8% of incidents.

Regions:

- 47% incidents in Eastern Africa region.
- 40% decrease in Western Africa region.

Our response to these challenges

- Greater support for WFP cooperating partners;
- Reinforced operational preparedness planning;
- Collaborative approaches for improving access;
- Consistent investment in security training;
- Improved tools in support of data-driven decisions;
- Advocated security planning in programme cycles.

Thank you
