

ANNEX VI.3

Baseline and target values set against corporate output indicators in the corporate results framework for 2026–2029

1. The corporate results framework for 2026–2029, due to be presented to the WFP Executive Board in November 2025 for approval, includes a commitment to setting annual targets for corporate output indicators, where the attribution of WFP's impact is more direct. In most cases, these targets will be aligned with expected funding levels and will reflect WFP's highly operational and resource-dependent context.
2. Once the corporate results framework has been approved, the corresponding targets and baseline values will be published in the annex of the management plan. Actual values achieved against these indicators will be reported annually in the annual performance report.
3. The list and content of standard outputs and output indicators presented below remain subject to change, in line with the ongoing informal consultations and review process leading up to the final submission of the corporate results framework to the Board in November 2025. Baseline values established for 2024 will be updated to reflect 2025 data during the first quarter of 2026. As a result, targets for 2026 may also be reviewed and adjusted based on this updated baseline information. This approach ensures that planning figures remain aligned with the most recent performance data and contextual realities.

STRATEGIC OUTCOME 1: EFFECTIVE EMERGENCY PREPAREDNESS AND RESPONSE		
Standard output 1.1: Crisis-affected populations receive emergency assistance that meets urgent needs and saves lives.		
Output indicator	2024 baseline	2026 target
1.1.1 Number of people provided with emergency assistance by WFP	80 million	90 million
1.1.2 Number of people benefiting from WFP emergency assistance delivered through national systems and programmes	<i>to be set in 2026</i>	<i>to be set in 2026</i>
1.1.3 Proportion of WFP responses to sudden-onset emergencies that take place within 72 hours	70%	70%
Standard output 1.2: Vulnerable groups receive nutrition support that prevents and manages malnutrition and wasting.		
Output indicator	2024 baseline	2026 target
1.2.1 Number of people in emergencies receiving transfers through malnutrition prevention and management programmes	21.0 million*	19.0 million*

* Baseline and target values for this indicator include 9 million and 9.5 million beneficiaries, respectively, reached through social and behavior change approaches implemented in emergency contexts

STRATEGIC OUTCOME 1: EFFECTIVE EMERGENCY PREPAREDNESS AND RESPONSE		
Standard output 1.3: National and subnational actors are supported in order to strengthen emergency preparedness and response capacities, and vulnerable population have access to anticipatory transfers that enable them to withstand shocks.		
Output indicator	2024 baseline	2026 target
1.3.1 Number of countries that received WFP support to strengthen national and subnational emergency preparedness and response policy frameworks and enhance institutional capacities in disaster preparedness, anticipatory action, macro insurance and/or emergency response	72	72
1.3.2 Number of people assisted by WFP with anticipatory transfers ahead of shocks	1.4 million	1.0 million
1.3.3 Number of countries supported by WFP through food security clusters that effectively manage national and subnational emergency responses, including through institutional capacity strengthening	23**	20

** 2025 baseline data.

STRATEGIC OUTCOME 2: REDUCED NEEDS AND ENHANCED RESILIENCE TO WITHSTAND SHOCKS		
Standard output 2.1: Communities and people experiencing recurrent or protracted acute food insecurity benefit from transfers, assets, training and livelihood support that build resilience to shocks.		
Output indicator	2024 Baseline	2026 Target
2.1.1 Number of people assisted by WFP through ecosystem restoration and community infrastructure interventions	4.6 million	3.1 million
2.1.2 Number of people assisted by WFP with skills for livelihood opportunities interventions	392 000	372 000
Standard output 2.2: Communities and people experiencing recurrent or protracted acute food insecurity have improved access to information, financial solutions and tools in order to manage shocks and risks and engage in markets.		
Output indicator	2024 baseline	2026 target
2.2.1 Number of WFP-assisted people benefiting from financial solutions	2.1 million	1.3 million
2.2.2 Number of WFP-assisted people benefiting from support to access markets	1.9 million	1.9 million
2.2.3 Number of people benefiting indirectly from WFP support designed to increase financial capacity and access to markets	3.9 million	2.8 million
2.2.4 Number of people benefiting indirectly from access to climate information services	14 million	9.4 million

STRATEGIC OUTCOME 2: REDUCED NEEDS AND ENHANCED RESILIENCE TO WITHSTAND SHOCKS		
Standard output 2.3: Communities and people experiencing recurrent or protracted acute food insecurity benefit from strengthened community platforms that deliver programmes to prevent and manage moderate acute malnutrition.		
Output indicator	2024 Baseline	2026 target
2.3.1 Number of people receiving transfers through malnutrition prevention and management programmes	5.0 million	5.0 million
2.3.2 Number of people reached by WFP and/or its partners through social behaviour change approaches designed to improve diets	10.5 million	10.0 million

STRATEGIC OUTCOME 3: ENABLED GOVERNMENT AND PARTNER PROGRAMMES		
Standard output 3.1: National safety net systems and programmes are strengthened through WFP's technical assistance and direct transfers, enhancing their capacity to effectively address people's food and nutrition needs.		
Output indicator	2024 baseline	2026 target
3.1.1 Number of countries to which WFP provided technical support for national safety net systems and programmes	19	25
3.1.2 Number of vulnerable people benefiting from transfers delivered by WFP as part of, or using, national safety net systems and programmes	<i>to be set in 2026</i>	<i>to be set in 2026</i>
3.1.3 Number of countries where WFP has facilitated South-South and triangular cooperation	38	48
3.1.4 Number of countries where WFP has supported the strengthening of national frameworks, institutional arrangements, and capacities for programme design and delivery for improved food security and nutrition	70	70
Standard output 3.2: School meal programmes benefit from technical assistance and children receive school meals.		
Output indicator	2024 baseline	2026 target
3.2.1 Number of girls and boys receiving WFP transfers through school-based programmes	20 million	22 million
3.2.2 Value and volume of school meal items sourced from local actors with WFP support	Value: USD 26 million Volume: mt 28 thousand	Value: USD 30 million Volume: mt 35 thousand
3.2.3 Number of countries receiving WFP capacity strengthening support for school meal programmes	76	76

STRATEGIC OUTCOME 3: ENABLED GOVERNMENT AND PARTNER PROGRAMMES		
Standard output 3.3: Humanitarian and development partners and governments benefit from support, coordination and/or services that enhance the effectiveness and efficiency of their operations and programmes.		
Output indicator	2024 baseline	2026 target
3.3.1 Number of countries where WFP is providing support (i.e. mandated or on-demand coordination and/or services) to governments and partners.	116	120
3.3.2 Number of government and/or partner organizations receiving support (i.e. mandated or on-demand coordination and/or services) from WFP.	1 131	900
3.3.3 Total USD value of support (i.e. mandated or on-demand coordination and/or services) provided by WFP to governments and partners.	USD 860 million	USD 687 million
3.3.4 Total number of passengers transported by WFP aviation	363 000	290 500
3.3.5 Number of destinations/locations served by WFP	319	315
3.3.6 Total quantity of cargo handled (stored, moved and/or sourced) by WFP on behalf of government and partners	593 521 <i>mt</i> <i>and</i> 1.4 million M ³	474 800 <i>mt</i> <i>and</i> 1.1 million M ³
3.3.7 Total USD value of cash transferred to people by WFP, as a service provided by WFP to governments and partners	USD 80 million	USD 64 million
