Management response to the recommendations in the summary report on the evaluation of the country strategic plan for Liberia (2019–2026)

Background

This document presents the WFP management response to the recommendations from the summary report on the evaluation of WFP country strategic plan (CSP) for Liberia (2019–2026). The evaluation covered CSP activities implemented between 2019 to 2026. Taking a utilization-focused, consultative approach, the evaluation served the dual purpose of accountability and learning and informed the preparation of a new country strategic plan.

The evaluation made a total of 4 recommendations, of which 2 are strategic and 2 operational. The response presented below sets out whether WFP agrees, partially agrees, or disagrees with the evaluation recommendations and sub-recommendations. It presents the planned (or taken) actions, responsibilities, and timelines.
