

# Strategic Results Framework

---

Informal Consultation  
23 October 2008

# Today's Discussion

- WFP's Strategic Results Framework – a tool for accountability, project management and learning
- Good Practice and framework details
- Next Steps and process

# WFP's Strategic Results Framework

---

# Strategic Results Framework

- Main element of WFP's results and **Accountability** architecture
- Aligns WFP's 5 Strategic Objectives with expected results, laying out a result chain with inputs, outputs and outcomes
- Helps to demonstrate WFP's contributions to achieving concrete outputs, outcomes and broader impacts (MDGs)

# Strategic Results Framework

- For Country Offices- supports **Project Management** and guides the entire project life cycle
- For WFP Senior Management - supports **Learning**
  - helps focus work
  - show results to stakeholders and
  - improve projects based on learning and feedback
- For the EB - links inputs and outputs providing transparent results

# Good Practice and Framework Details

---

## Based on Good Practice

- Result of extensive consultation involving both field and technical units (School Feeding, Nutrition, HIV/AIDS and VAM)
- RBM practice, UN reform, UNDAF terminology and indicators, Sphere standards, WHO standards, etc.

# Based on Good Practice

- Better alignment between assessment and reporting results by adapting VAM assessment indicators used from baseline, monitoring to evaluation
- Examples: The Coping Strategy Index, The Disaster Preparedness Score

# Based on Good Practice

- WFP is accountable for results achieved at output level
- Outcomes measured to assess intended improvements in people's lives - requires complementary interventions and strong partnerships

# Based on Good Practice

- Aligning Strategic Objectives and SMART indicators
- Establishing clear measurable targets and introducing a method for aggregating results

# Ongoing Learning

- As WFP learns from implementing the 2008-11 Strategic Plan, the results framework may require adjustments
- Framework is considered to be a living document- to be improved over time
- Challenges remain but WFP is committed to systematically measure project results

# Next Steps

---

# Sharpen WFP's results story

- Align WFP processes and systems (new Strategic Plan, results framework, financial framework, etc.)
- Provide right tools and information to right people for better decision making and accountability
- Improve capacity to measure performance and feed learning into projects, operations and policy

# Concrete Steps

Framework will guide Strategic Plan implementation: project design, monitoring, reporting, work planning, performance assessments, etc.

- Translation of framework into operational guidance underway (indicator compendium)
- Alignment of new projects a priority - framework a basis for 2009 reporting
- Final revisions to the framework based upon the discussion today

---

**Thank you!**
