

## **Tech, Innovation and the End of Hunger**

An immersive technology experience

Exhibition on the margins of the Second Regular Session of the Executive Board

26–29 November 2018

Forum A, WFP Headquarters

We are pleased to welcome you to visit *Tech, Innovation and the End of Hunger*, an immersive exhibition produced by the World Food Programme. By using cutting-edge technology, including augmented reality and chatbots, we will show you how digital solutions are helping WFP to reach and empower the furthest behind.

An interactive experience will demonstrate how technology and innovation is driving change in many of the countries where WFP works, helping us to know more, know better and serve better.

Look forward to welcoming you there.
