

# WFP-DIME Partnership

February 26th, 2020

# Development Impact Evaluation (DIME)

conduct  
rigorous research  
generate  
actionable data  
and evidence  
inform  
real-time decisions  
increase  
policy effectiveness

**200+ Impact  
Evaluations  
50+ countries**

# OEV and DIME: A Common Agenda

Sustainable Development Goal 17 commits World Bank and WFP to strengthen global partnerships, including for data and evidence

March 2018, the World Bank and WFP developed a “Joint Strategy for Tackling Humanitarian and Development Challenges”

OEV and DIME are now partners in generating impact evaluation evidence and building the capacity of our country counterparts

Evidence generated by this partnership will be used to improve effectiveness of ongoing programs and inform new strategies

# Impact Evaluation Windows

## Window 1: Cash Transfers and Gender

- How can delivery of cash based transfers be structured to promote gender equality and women's empowerment?
- Measuring impacts on agency and norms

## Window 2: Climate and Resilience

- How does targeting, layering, and sequencing WFP evaluations change welfare trajectories?
- Developing coherent resilience measurement
