WFP Guinea-Bissau

2G CSP – informal EB consultations

27 July 2022

A new CSP in Guinea-Bissau to align with partner priorities and the population's needs

New development strategy
Hora Tchiga, approved by the government in 2020

New CCA / UNSDCF (2022-2026)
Highlighting priority areas for collaboration between the UN system and the government

New areas for collaboration
Identified with government counterparts and development partners

Aligned with and informed by

Guinea-Bissau 2G CSP (2023-2027)

Responding to

Growing food security and nutrition needs
4 overlapping crises: climate change, rising costs, COVID-19 and conflict in Ukraine

Lessons learnt from the 1G CSP
identified through evaluations, studies and consultations
(SF Decentralized Evaluation, FNG and COHA studies, Climate Adaptation Response Analysis, consultations with government and partners)

Four programmatic shifts in the 2G CSP

Home Grown School Feeding is linked to local **value chains**. **Nutrition** is mainstreamed. **Crisis response** and **resilience** are integrated.

Improve **integration and synergy** across programmes
1.

Mainstream **climate change adaptation**
2.

3. Support the **national social protection system**

4. Strengthen **transversal issues across interventions**

National partners are provided with **capacity strengthening and technical support** to build a nutrition-sensitive and shock-responsive **social protection system**.

National capacity for **early warning** is strengthened. **Rural communities are more resilient** to climate change.

Disability inclusion, gender equality and women's empowerment, and environmental sustainability aspects are streamlined

Strong partnerships to support our 2G CSP

| 2G CSP (2023-2027) | | | |
|---|--|--|--|
| SDG 2 Zero Hunger | | | SDG 17 Partnerships |
| <p>SO 1</p> <p>Crisis-affected populations are able to meet their essential needs</p> | <p>SO 2</p> <p>Vulnerable populations have access to health, education and nutrition</p> | <p>SO 3</p> <p>Rural communities have increased resilience to climate change and socio-economic shocks</p> | <p>SO 4</p> <p>The social protection system in Guinea-Bissau is strengthened</p> |

Strengthen collaboration with the **Government** to enhance capacities and accelerate handover

Enhance joint programming and advocacy with **UN agencies** to improve synergies and progress towards the SDGs

Consolidate and diversify **donor base** (IFIs, private sector...) to secure flexible and multi-annual funding

Adopt a **“whole society” approach**, enhancing ownership of assisted communities and NGOs
