Round Table

# WFP CSP IN ZAMBIA 2019–2023

## Five strategic outcomes

(Allocated resources versus needs-based plan as of July 2022 Budget Revision 3)

# FINDINGS

# Q1 TO WHAT EXTENT ARE WFP'S STRATEGIC POSITION, ROLE AND SPECIFIC CONTRIBUTION BASED ON COUNTRY PRIORITIES AND PEOPLE'S NEEDS, AS WELL AS WFP'S STRENGTHS?

Well aligned with national priorities to achieve SDGs 2 and 17

Highly relevant given high levels of undernutrition and food insecurity

Active engagement with Government , UN Country team and private sector

Strong ability to adapt to context evidenced by response to drought and Covid 19

## Q2 WHAT IS THE EXTENT AND QUALITY OF WFP'S SPECIFIC CONTRIBUTION TO CSP STRATEGIC OUTCOMES?

 **SO1** Crisis response was effective for Covid 19 - less so for drought and refugee ops

 **SO2** Some contribution to Government capacity to improve nutrition and some improved nutritional practice at community level

 **SO3** Contribution to resilience and increased access to markets among smallholder farmers, particularly women

 **SO4** Successful transition to Government of the Home Grown School Meal programme, and some contribution to social protection

 **SO5** Improved partners capacity through on demand logistics response

## Q2 CONTRIBUTION TO CROSS CUTTING ISSUES

WFP adhered to the **humanitarian principles**, including operational independence

Mitigation measures for **Protection against sexual exploitation and abuse (PSEA) and Gender Based Violence (GBV)** in place for Cash Based Transfers

Some contributions to **women's empowerment** (GAM 3), but no comprehensive addressing of gender transformative practices (GAM 4)

**Accountability to affected populations (AAP)** mechanisms in place

Interventions not always **environmentally sustainable**

# Q3 TO WHAT EXTENT DID WFP USE ITS RESOURCES EFFICIENTLY IN CONTRIBUTING TO CSP OUTPUTS AND STRATEGIC OUTCOMES?

Interventions mostly timely except during the pandemic – but delays in drought response

Coverage nearly 100% of targets for crisis response, but ration cuts reduced nutritional outcomes  
Some highly food insecure areas omitted under geographical targeting

Cost-efficiency benefited from shift in-kind - CBT

# Q4 WHAT ARE THE ENABLING FACTORS THAT EXPLAIN WFP PERFORMANCE AND THE EXTENT TO WHICH IT HAS MADE THE STRATEGIC SHIFT EXPECTED BY THE CSP?

## **Enabling factors:**

- Strong partnerships
- Human Resources

## **Constraining factors:**

- Funding delays and shortfalls
- Economic crisis – public spending constraints
- Covid 19 - delays and cancelations

# CONCLUSIONS

WFP able to position itself strategically- capacity to scale up.  
But constrained strategic shift

The CSP relevant and aligned with national strategies and policies, as well UN plans. Based on WFP comparative advantages

Strong partnerships with government institutions, UN partners and private sector = contribution to outcomes

Strong effectiveness of Covid 19 response but less in the drought and refugee operation. Some results in resilience of SHFs and support to social protection

# CONCLUSIONS (CONT.)

Targeting at community and household level appropriate, but geographical targeting excludes some highly food insecure provinces

Medium- and long-term sustainability example = HGSM programme

Commitments on cross cutting issues mostly fulfilled except environmental sustainability

# RECOMMENDATIONS

1

Reconsider geographical targeting to include areas in crisis as per IPC

2

Expand the nutrition portfolio by strengthening the coordination structures at local levels and advocate for the use of the FNG analysis to inform the nutrition policy

3

Strengthen engagement in the social protection space in partnership with UNICEF and the World Bank

4

Increase attention to crosscutting issues to improve GAM score and reduce environmental impact of interventions

5

Increase advocacy and diversification of funding for the refugee operation in partnership with UNHCR

6

Continue to develop resilience for SHF through CCS and stimulation of business-to-business networks at local level
