Second regular session of the Executive Board - November 2023

World Food Programme

SAVING
LIVES
CHANGING
LIVES

Operational context

Population

Population of
215,000

50% under 25 years

30% live on less
than USD1.90/day

Economy

Geographic isolation

Reliance on imports

97% public
investment financed
through debt and
ODA

Social

Inadequate social
protection coverage

Limited economic
opportunities for
youth

Persistent gender-
based violence

Health & Nutrition

High anaemia
prevalence (**65%**
children under 5)

Increasing
overweight, obesity
and non-
communicable
diseases

Climate Change

High vulnerability to
climate shocks

Rising sea levels
leading to floods

Droughts account for
25% of hazards

Integrated approach

School Feeding

Revised school feeding law & integration of school feeding into the social protection system

Climate Adaptation

Green Climate Fund and subsequent development of a National Adaptation Plan

Local Production

Focus on resilient food systems

Emergency Preparedness

Contingency plan to prioritise SF/SHF with food assistance while developing DRM and early warning systems

CSP strategic focus
