82.2

88.7

107.9

100.6

81

Number of people to whom food

was delivered (in millions)

² The three emergency activation phases, which in 2022 replaced the previous classification of level 1, level 2 and level 3 emergencies, are early action and emergency response, corporate attention, and corporate scale-up. Operations that were in a corporate attention or corporate scale-up phase (equivalent to level 2 or level 3 emergencies) during the calendar year are counted.

³ This figure does not include the response to the coronavirus disease 2019, the first global level 3 emergency experienced by WFP headquarters.

⁴ This figure does not include the corporate scale-up to address the global food crisis.

⁵ WFP started to report on the residence status of migrants in 2022 to align with the International Organization for Migration, which defines a migrant as any person who is moving or has moved across an international border or within a State away from his/her habitual place of residence, regardless of the person's legal status, whether the movement is voluntary or involuntary, the causes of the movement or the length of the person's stay.

allholder	agricultural market support					
### ##################################	Number of smallholder farmers - participating in capacity building	0.048	0.405	0.845	1.3	1.9

⁶ From 2020 onwards, CBTs and commodity vouchers were treated as two separate transfer modalities. Data from years subsequent to 2020 cannot therefore be compared with data from previous years.

 $^{^{7}}$ In 2020, WFP began to track the beneficiaries of individual capacity strengthening separately.

⁸ This figure includes USD 83 million of investments in capacity strengthening for national social protection systems and programmes.

 $^{^{\}rm 9}$ WFP started collecting this information in 2023.

 $^{^{\}rm 10}$ Includes UNHCR/WFP joint post-distribution monitoring missions in 2020, 2021 and 2022.
