# Oversight Progress – Q4 2025

## Overall status

- Total outstanding actions remain **high (2,321)**, driven primarily by evaluation recommendations (1,555) and IA (503)
- Q4 2025 throughput remained constrained, with 453 new actions issued versus 174 closures, resulting in an increase in open actions.
- Since 2022, evaluation and IA account for the largest volumes of open actions, despite relatively higher historical closure rates, reflecting scale rather than effectiveness alone.

# Oversight Progress – Q4 2025

## Risk Profile

## Risk concentration

### 754 high-priority actions are overdue:

- **around 70% relate to performance and effectiveness**, mainly originating from CSPs and decentralized evaluations and concentrated at country office level. This pattern points to continued delivery-level implementation pressures;
- **a smaller but critical subset (~30%) concerns control and compliance gaps**, largely at GHQ level and concentrated in ICT, risk management, logistics, monitoring, cooperating partner management and finance. These gaps reflect the need for stronger planning and oversight, clearer roles and responsibilities, more effective performance measures, and better integration of systems and tools.

## Strategic direction

- **Reinforce senior leadership sponsorship** of priority overdue actions
- **Conduct root-cause analysis of implementation delays** and agree targeted corrective actions
- **Maintain proactive senior leadership engagement with the External Auditor**
- **Engage early with the Joint Inspection Unit** to align expectations for 2026 in the context of budget constraints.

# Management Oversight – Normative Instruments

## **Accountability and Oversight Framework**

*(Approved by the EB in November 2025)*

Sets the strategic direction

## **Framework for Management Oversight - Revised**

*(Issued in January 2025)*

Interprets these standards for management oversight, defining who does what and how

## **Management Oversight Missions SOP**

*(Issued in November 2025)*

Puts the framework into action, guiding teams through the actual process of oversight missions and follow-up

These three elements work together to embed assurance and oversight into WFP's governance model but also provide the flexibility to adapt and prioritize in response to operational realities and resource limitations.

# Update on Assurance (since 26 Sept 2025 Regular Briefing with RMD)
