|  | Migrants                     | -    | -    | 1.3 <sup>6</sup> | 0.9   | 0.5  | 0.4  |

<sup>1</sup> Historical figures in this annex might differ slightly from those published in previous annual performance reports owing to updates or further validation of figures following publication.

<sup>2</sup> The three emergency activation phases, which in 2022 replaced the previous classification of level 1, level 2 and level 3 emergencies, are early action and emergency response, corporate attention, and corporate scale-up. Operations that were in a corporate attention or corporate scale-up phase (equivalent to level 2 or level 3 emergencies) during the calendar year are counted.

<sup>3</sup> This figure does not include the response to the coronavirus disease 2019, the first global level 3 emergency experienced by WFP headquarters.

<sup>4</sup> This figure does not include the corporate scale-up to address the global food crisis.

<sup>5</sup> This figure only covers the period January to June 2025, until the publication of the corporate alert system was paused.

<sup>6</sup> WFP started to report on the residence status of migrants in 2022 to align with the International Organization for Migration, which defines a migrant as any person who is moving or has moved across an international border or within a State away from his/her habitual place of residence, regardless of the person's legal status, whether the movement is voluntary or involuntary, the causes of the movement or the length of the person's stay.

|                                                                                     |                                                                                                                                                         |      |      |       |       |      |      |
|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------|------|-------|-------|------|------|
|  | Number of people provided with unconditional food assistance through the distribution of food, cash-based transfers or commodity vouchers (in millions) | 82.9 | 91.0 | 113.4 | 106.5 | 79.9 | 77.3 |
|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------|------|-------|-------|------|------|

**Nutrition and HIV/AIDS**

|                                                                                     |                                                                                                                   |      |      |      |      |      |      |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|------|------|------|------|------|------|
|  | Number of children to receive special nutritional support (in millions)                                           | 11.8 | 15.8 | 18.6 | 17.8 | 17.4 | 16.1 |
|                                                                                     | Number of women to receive additional nutrition support (in millions)                                             | 5.5  | 7.7  | 9.6  | 10.1 | 9.4  | 7.5  |
|  | Number of people living with and/or affected by HIV/AIDS and tuberculosis to receive WFP assistance (in millions) | 0.5  | 0.2  | 0.4  | 0.3  | 0.1  | 0.1  |
|                                                                                     | Number of the 35 HIV and AIDS fast-track countries to receive WFP assistance                                      | 19   | 19   | 20   | 17   | 16   | 14   |

<sup>7</sup> From 2020 onwards, cash-based transfers and commodity vouchers were treated as two separate transfer modalities. Data from years subsequent to 2020 cannot therefore be compared with data from previous years.

<sup>8</sup> In 2020, WFP began to track the beneficiaries of individual capacity strengthening separately.
