

Draft Private Sector-Partnerships & Fundraising Strategy (2013 – 2017)

Informal Consultation 16 April 2013

World Food Programme | 1

Time to Revisit the Strategy

- Assess best practices and lessons learned during the first 5 years
- Respond to the 2012 evaluation
- Changes in the global context increasing role of the private-sector in achieving sustainable development
- Need for alignment with fit-for-purpose and the upcoming strategic plan

Private Sector Benefits to WFP

Overview 2008 - 2012

In 2008/09, WFP invested \$7.4 M

Since then, \$549 M raised

- \$283 M in sustainable funding (highly predictable contributions from ongoing and new partnerships)
- \$266 M in less predictable funding (emergency and large foundation gifts)

Of these funds

- \$493.4 M to programmes
- \$27.9 M operating cost of the private sector division
- \$27.7 M contributed to the PSA budget
- The projected 2013 balance in the private sector account is \$7.5 M, slightly more than the initial investment

The Three Priorities of the Plan are to

- 1. Improve the value & quality of partnerships that develop WFP capacity
- 2. Increase resources generated from partnerships for fundraising
- 3. Enhance WFP's ability to partner effectively with the private sector at all levels of the organisation

Key Changes Include:

- 1. Measuring and reporting on the distinct value of partnerships for capacity and partnerships for fundraising
- 2. Establishing a mechanism to better evaluate partnerships that develop WFP capacity
- 3. Distributing additional resources to the regional bureaux and country offices
- 4. Integrating the private-sector function into PSA

With a continuing commitment to transparency, accountability and impartiality

Funding the Private Sector Function

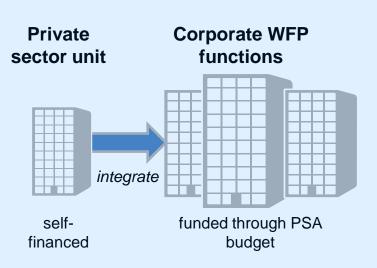

Integrate private sector function in PSA budget

The private sector division has proven its viability by

- > Providing both capacity building and resource generating partnerships that support programmes
- > Fully covering the cost of management and administrative functions
- Contributing to PSA

This provides the confidence to integrate the function into PSA

The integration will:

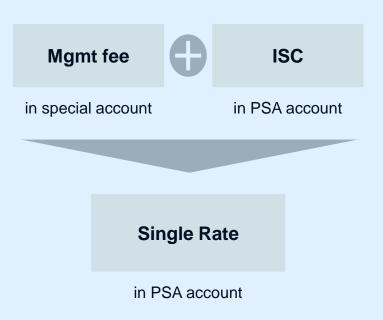

- Make governance of and accountability for the funds raised more consistent
- Ensure that the private-partnership and fundraising function is prioritized through budgetary control
- Facilitate collaboration and synergies between the Private Sector and Government Partnerships Division
- Address the recommendation of the evaluation

Funding the Private Sector Function

Merge management fee and ISC into one rate

Along with PSA integration: merge management fee and ISC into one rate that fully supports private sector management and administrative functions

- Within next years, proposed rate will be above current corporate ISC
- For the first years, it is expected that the contribution to PSA will be small
- As private sector growth is achieved, the rate may be reduced to reflect greater scale and efficiency
