

# Update on the guidance on the United Nations sustainable development cooperation framework and common country analysis

19 November 2019 | David Kaatrud, Director Programme-Humanitarian and Development Division (PHD)

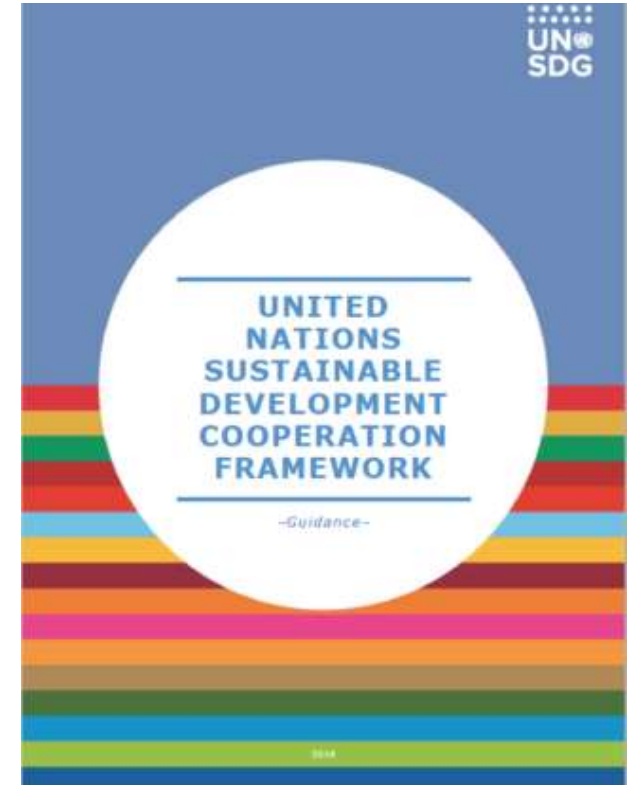

# UN Common Country Analysis (CCA)

---

- No longer a one-off event, but a “living document”. All UNCTs are expected to update their CCAs by 2020.
- CCA is expected to cover all pillars of United Nations work in-country and determine “who is being left behind, and why?”
- CCA has potential to highlight food security & nutrition challenges, opportunities and gaps in achieving SDG2.
- WFP will actively contribute to the CCA, making available relevant data and analysis, including Zero Hunger Strategic Reviews; and working in coordination with the RBAs, UNICEF and other partners.
- Second generation Zero Hunger Strategic Reviews are not intended to be new processes but will be integrated into the new CCA process and build on previous work.

# UN Sustainable Development Cooperation Framework (UNSDCF)

- Cooperation Frameworks (UNSDCFs) will be synchronized with National Development Planning cycles.
- United Nations Development, Humanitarian and Peace programming instruments will continue to exist side-by-side but be better aligned.
- Development outcomes in agency planning documents (e.g. WFP CSPs) will be derived from the UNSDCF, and country level programme cycles will align with UNSDCF cycles.
- The UNSDCF roll-out is in full swing. United Nations Country Teams throughout the world are engaging in the first wave of UNSDCFs.
- Headquarters and regional bureaux are working closely with country offices that are embarking on their UNSDCF-aligned CSP/ICSPs.
