What we do

Enable WFP and other humanitarian operations

RM enables and transforms WFP operations through its expertise in information and telecommunications technology, financial and budget management, engineering, and environmental and fleet management.

Drive performance management

RM facilitates all phases of the performance management cycle to ensure WFP delivers value on donor contributions, from planning to budgeting, to monitoring and reporting.

RM is responsible for producing key corporate documents: the Management Plan, the Annual Performance Report, and the Annual Financial Statements

Manage and safeguard resources

RM safeguards WFP's financial and physical resources by setting corporate guidance on internal / governance controls and ensuring that risks are effectively managed and mitigated.
