
ANNEX III-C: RESULTS AGAINST OUTPUTS, OUTCOMES AND CROSS-CUTTING PRIORITIES

1. This annex presents the results of output, outcome and cross-cutting priority indicators for operations active and monitored during the reporting year, using the methodology described in annex III-B¹, and are intended to complement the summaries and narrative provided in part III of the APR. Further detail can be found by accessing the publicly-available APR Dashboard.
2. The following column definitions apply:
 - a) *No. of countries*: the number of country offices reporting against an indicator. This is the overall number for the indicator, even if for those cross cutting indicators disaggregated by sex, the country may not have reported data disaggregated by sex for all of its measurements.
 - b) *No. of measurements*: the total number of measurements against an indicator.² This is the overall number for the indicator, even if for those cross-cutting indicators disaggregated by sex, the country may not have reported data disaggregated by sex for all of its measurements.
 - c) *2024 planned or target*: the aggregated planned or corporate-level target value. For indicators measuring direct beneficiaries reached and transfers given to them to improve their food security and nutrition status (most Category A and B output indicators), planned or target values are typically based on assessed needs, while the planned or target values for other indicators are based on the ability to implement the assessed needs within the forecast resources.
 - d) *2024 actual*: the aggregated actual value.
 - e) *Performance*: percentage of the target achieved.
 - f) *Improvement or stability rate*: percentage of measurements that improved or were stable compared with their baseline.
 - g) *Achievement rate*: percentage of measurements that met or exceeded their target.

¹ For further details on the scope of the results aggregated in this annex, please refer to annex III-B, paragraph 3.

² The number of measurements is applicable to indicators that draw on programme monitoring data. Indicators that are calculated based on other corporate data sources do not refer to such measurement (marked as "N/A").

Sustainable Development Goal 2 – Support countries in achieving zero hunger

Strategic outcome 1 – People are better able to meet their urgent food and nutrition needs

Outcome indicators

Indicator name	No. of countries	No. of measurements	Improvement or stability rate	Achievement rate
Consumption-based coping strategy index (average)	66	143	62%	48%
Economic capacity to meet essential needs	28	50	62%	38%
Food consumption score - Percentage of households with acceptable food consumption score	69	153	64%	48%
Food consumption score - Percentage of households with poor food consumption score	69	153	59%	52%
Livelihood coping strategies for essential needs - Percentage of households not using livelihood based coping strategies	22	30	73%	53%
Livelihood coping strategies for essential needs - Percentage of households using emergency coping strategies	22	30	70%	63%
Livelihood coping strategies for food security - Percentage of households not using livelihood based coping strategies	58	134	65%	45%
Livelihood coping strategies for food security - Percentage of households using emergency coping strategies	58	134	62%	58%
Minimum diet diversity for women and girls of reproductive age	31	59	66%	47%
Moderate acute malnutrition treatment default rate	25	51	41%	84%
Moderate acute malnutrition treatment mortality rate	25	52	75%	90%
Moderate acute malnutrition treatment non-response rate	24	51	41%	82%
Moderate acute malnutrition treatment recovery rate	26	53	45%	89%
Number of complementary school health and nutrition interventions implemented alongside school feeding delivered by WFP - Mean (average) number of complementary interventions provided to at least one school in your country office	5	7	100%	57%

Indicator name	No. of countries	No. of measurements	Improvement or stability rate	Achievement rate
Percentage increase in purchasing power of WFP voucher beneficiaries	4	4	25%	25%
Percentage of essential need items available to beneficiaries in the targeted markets where WFP operates	8	8	62%	50%
Percentage of individuals practicing recommended healthy diet behaviour	4	5	100%	100%
Percentage of moderate acute malnutrition cases reached by treatment services (coverage)	18	39	72%	59%
Proportion of children 6-23 months of age who receive a minimum acceptable diet	26	50	76%	46%
Proportion of eligible population reached by nutrition preventive programme (coverage)	24	47	85%	68%
Proportion of target population who participate in an adequate number of distributions (adherence)	23	35	60%	46%
Resilience capacity score - 1. Total low resilience capacity score	2	2	50%	100%
Retention rate, by grade - retention rate	10	11	45%	27%

CC.4.2 Publicly available annual report on WFP's efforts to reduce their climate and environmental footprint (QCPR)	N/A	N/A	Overall	Yes	Yes	100%

⁴ This indicator is aggregated for the APR based on the results reported by country offices using the corporate results framework cross-cutting indicator CC.4.1. "Proportion of field-level agreements (FLAs)/memorandums of understanding (MOUs)/construction contracts (CCs) for CSP activities screened for environmental and social risks." As the target of this indicator is only relevant at country office level, at corporate level WFP monitors the number of country offices where the screening for environmental and social risks has been conducted. In the annual performance report this corresponds to the number of country offices where the screening for environmental and social risks follow-up values are higher than zero and it is expected to reflect the number of country offices with applicable field-level agreements.

Indicator name	No. of countries	No. of measurements	Type	2024 target	2024 actual	Performance
CC.4.3 Percentage of country offices implementing environmental management systems	N/A ⁵	N/A	Overall	60	60	100%
