Executive Board
Second regular session
Rome, 16–20 November 2026

Distribution: General

Date: 30 July 2026

Original: English

Agenda item 7

WFP/EB.2/2026/7-A/9/DRAFT

Operational matters – Country strategic plans

For decision

Executive Board documents are available on WFP's website (<https://executiveboard.wfp.org>).

Draft Sudan interim country strategic plan (2027–2029)

Duration	1 January 2027–31 December 2029
Total cost to WFP	USD 2 759 575 851
Framework on accountability for results score	2.9

Draft decision*

The Board approves the Sudan interim country strategic plan (2027–2029) (WFP/EB.2/2026/7-A/9) at a total cost to WFP of USD 2,759,575,851.

* This is a draft decision. For the final decision adopted by the Board, please refer to the decisions and recommendations document issued at the end of the session.

Focal points:

Mr M. Hollingworth
Assistant Executive Director
Programme Operations Department
email: matthew.hollingworth@wfp.org

Mr A. Alwardat
Country Director
email: abdallah.alwardat@wfp.org

This interim country strategic plan (ICSP) is aligned with the WFP strategic plan for 2026–2029 and is guided by humanitarian principles and WFP's approved policy framework.

WFP's strategic programmatic priorities and partnerships

1. In 2026, an estimated 33.7 million people across the Sudan require humanitarian assistance, including 28.9 million people in need of food security and livelihood support. It is projected that nearly 19.5 million people (41 percent of the population) will face acute food insecurity (phase 3 or above on the Integrated Food Security Phase Classification (IPC) scale), including 135,000 people in IPC phase 5 (catastrophe), 5 million in IPC phase 4 (emergency) and 14 million in IPC phase 3 (crisis). The risk of famine is present in 14 areas across Darfur and Kordofan.
2. At the same time, 4.2 million people are affected by acute malnutrition, including 825,000 children under 5 suffering from severe acute malnutrition. Stunting and micronutrient deficiencies are widespread.
3. Refugees, internally displaced persons, returnees, persons with disabilities and households headed by women face heightened vulnerability and protection risks.
4. The evaluation of WFP's country strategic plan (CSP) for the Sudan for 2019–2023 and WFP's corporate emergency response to the Sudan regional crisis from 2023 to 2025 affirm that WFP continues to have a comparative advantage in delivering life-saving assistance rapidly and at scale. This advantage is anchored in WFP's field presence, operational reach, logistics capability, digital delivery systems and analytical expertise. Combining emergency assistance with resilience building, school feeding, local procurement and cash-based transfers, WFP is uniquely positioned to save lives while supporting recovery and strengthening long-term food security.
5. Building on these strengths, WFP's foremost priority under this ICSP is to address the urgent needs of crisis-affected populations and help prevent famine. Where conditions permit, WFP will progressively expand recovery and resilience interventions to complement life-saving assistance, reduce humanitarian needs over time and leverage humanitarian safety nets as a foundation for future nationally owned social protection systems.
6. The ICSP introduces four strategic pivots. First, WFP will *anticipate* crises through early warning mechanisms, anticipatory action, risk financing and malnutrition prevention. Second, WFP will *focus* resources on the greatest needs while scaling resilience activities where feasible. Third, WFP will *integrate* humanitarian, recovery, resilience and development interventions through layered and sequenced approaches that build pathways to self-reliance. Fourth, WFP will *amplify* national and local ownership through a gradual shift from direct implementation to enabling sustainable locally driven solutions.
7. WFP's engagement will continue to be guided by humanitarian principles and international humanitarian law. As a design principle across all outcomes and activities, the ICSP will systematically mainstream nutrition, protection, accountability to affected people, localization and environmental sustainability. These cross-cutting priorities will contribute to reducing vulnerability and disparities while strengthening people's capacity to meet their own needs. Emphasis will be placed on advancing the economic empowerment of rural women and expanding the livelihood opportunities that priority food value chains can offer vulnerable rural groups.

8. The ICSP is fully aligned with the 2024 United Nations common country analysis for the Sudan and the interim cooperation framework for the Sudan for 2026–2028. The ICSP outcomes will contribute to and are derived from all four strategic priorities of the interim cooperation framework: restoration of inclusive essential services; socioeconomic recovery, resilient livelihoods and food security; peace, justice and strong institutions; and environment, climate action and disaster resilience.

Interim country strategic plan outcome 1: Crisis-affected people across the Sudan have access to life-saving food and nutrition assistance and are supported by strengthened national capacity to anticipate, withstand and respond to shocks by 2029

9. Outcome 1 will be WFP's highest priority throughout the ICSP period, accounting for nearly 80 percent of the country portfolio. WFP will focus on populations facing the greatest risks – internally displaced persons, persons with disabilities, refugees, returnees and crisis-affected host communities – ensuring that life-saving assistance reaches the right people at the right time with maximum impact in order to prevent famine and hunger-related deaths. WFP will prioritize hunger and malnutrition hotspots, particularly in Darfur, Kordofan and other hard-to-reach areas.
10. Under activity 1, WFP will provide integrated life-saving food and nutrition assistance through a combination of in-kind food, cash-based transfers and specialized nutritious foods, selected according to market functionality, access constraints and operational feasibility. Emergency nutrition interventions will prioritize children under 5, pregnant and breastfeeding women and girls, and children at greatest risk of malnutrition and mortality. This will be complemented by nutrition education and social and behaviour change activities. Assistance will be informed by IPC analyses and joint prioritization activities undertaken with the Ministry of Health, the United Nations Children's Fund (UNICEF) and other nutrition partners.
11. Alongside general food assistance, WFP will invest in early warning systems, anticipatory action contingency planning and the pre-positioning of food and other critical supplies to enable early and more cost-effective responses to emerging shocks. By combining life-saving assistance with anticipatory measures, WFP will help to prevent the deterioration of food security and nutrition, mitigate famine risks and reduce future humanitarian needs.
12. At the same time, WFP will strengthen links between emergency response and resilience interventions in order to break the cycle of recurrent crises and reduce reliance on humanitarian assistance. In collaboration with partners, where appropriate WFP will support a phased transition from emergency assistance to resilience building approaches, including the promotion of recovery-oriented livelihoods under outcome 2 and productive safety nets under outcome 3. This transition will be guided by continuous monitoring and multisectoral food security and nutrition assessments aimed at ensuring that adjustments in assistance modalities and duration remain anchored in evolving needs, household coping capacity and operational realities.
13. WFP will achieve this outcome through partnerships with relevant national institutions, other United Nations entities and international and national non-governmental organizations (NGOs), leveraging their complementary capacities to strengthen access, targeting, delivery and accountability. WFP will work closely with UNICEF, the Office of the United Nations High Commissioner for Refugees and other partners to strengthen identity management, reduce programme overlaps and support effective deduplication. WFP will partner with local actors and community-based organizations, including mutual aid groups, community volunteers, informal initiatives and groups led by women and young people, to extend access to hard-to-reach areas.

14. Cross-cutting priorities under this outcome will include humanitarian principles, assurance, nutrition and localization. WFP will implement programmes with strong oversight, risk management and accountability mechanisms to ensure transparency and safeguard resources. Assistance will be delivered in a safe, dignified and conflict-sensitive manner, enabling affected communities to provide feedback and participate in decision-making. Nutrition will be integrated through community-based interventions promoting healthy diets, improved feeding practices and positive behaviour change. WFP will work with government institutions, local organizations and communities to strengthen their capacity to support locally led solutions and build resilience.

Interim country strategic plan outcome 2: Food-insecure and shock-affected communities in targeted areas have improved livelihoods and better access to healthy diets, thereby reducing humanitarian needs by 2029

15. Activities under outcome 2, accounting for approximately 12 percent of the proposed budget, will complement the life-saving assistance provided under outcome 1. Through sequenced, context-specific resilience interventions, WFP aims to protect development gains, prevent further deterioration and reduce reliance on recurrent humanitarian food assistance.
16. Interventions will be geographically and operationally aligned with activities under outcome 1 and implemented in areas where life-saving assistance has stabilized acute food and nutrition insecurity or where conditions support transition. WFP will prioritize crisis-affected areas with protracted or recurrent food insecurity and malnutrition, targeting in particular internally displaced persons, refugees, returnees, host communities, households led by women and nomadic populations. Attention will be given primarily to locations hosting or bordering populations in IPC phase 4 or 5. In severe circumstances, especially where people are in IPC phase 4, any adjustments to assistance will be coordinated with partners in order to mitigate risk and maintain support for the most vulnerable.
17. Under activity 2, WFP will deliver integrated packages of resilience activities combining livelihood support, asset creation, ecosystem restoration, nutrition support and market strengthening. Ecosystem restoration, community infrastructure and livelihood opportunities will serve as the main entry points, supported through productive safety nets, including food or cash transfers linked to community asset creation. Through a “stabilize-strengthen-sustain” approach tailored to local conditions, WFP will provide immediate support for vulnerable households, stabilize communities and strengthen resilience to future shocks.
18. In areas where conflict and market disruption have severely constrained productive assets, WFP will support limited time-bound production-related activities as part of integrated recovery packages. WFP’s role will be implementation-focused, leveraging its operational presence, supply chain capacity, procurement systems and delivery platforms, while technical leadership on agricultural production will remain with the Food and Agriculture Organization of the United Nations (FAO) and specialized national partners, including the Sudan’s Agricultural Research Corporation. These interventions will be aimed at restoring productive capacity, protecting livelihoods and supporting local market and food system recovery, linking with nutrition and school-based programmes where feasible.
19. WFP will achieve this outcome by working in close partnership with the Ministry of Agriculture and Irrigation, international financial institutions, including the African Development Bank and the World Bank, and development actors. In collaboration with FAO, the International Fund for Agricultural Development and other key partners, WFP will support local market systems, post-harvest functions, entrepreneurship and livelihood opportunities, especially for women and young people. Where conditions allow, WFP will

also expand economic opportunities for vulnerable communities, including displaced populations, while leveraging local small and medium-size private sector enterprises.

20. Work under this outcome will advance the cross-cutting priorities of women's empowerment, nutrition, protection, conflict sensitivity, environmental sustainability and localization. WFP will promote inclusive community-led approaches that strengthen participation in decision-making and expand access to economic opportunities, particularly for women. Nutrition will be integrated through community-based interventions that improve dietary practices and nutrition awareness.

Interim country strategic plan outcome 3: National and subnational actors – especially community-based organizations, non-governmental organizations and the private sector – have strengthened capacity to deliver school-based programmes and safety nets by 2029

21. Under this outcome, and in line with its localization policy, WFP will place local actors at the forefront in order to strengthen ownership and implement nationally anchored solutions in areas of WFP's comparative advantage. WFP will work with national and subnational partners to strengthen implementation capacity and systems, with school-based and safety-net programmes as flagship priorities.
22. Through activity 3 WFP will implement school-based programmes, including home-grown school feeding, as part of an integrated package of school health and nutrition services linked to outcome 2. Through these programmes WFP, in collaboration with the Ministry of Social Development, UNICEF and FAO, will provide a platform for tackling hunger, improving nutrition, enhancing education, connecting smallholder farmers to markets, promoting local procurement and stimulating local economies, thereby sustaining human capital gains. WFP will leverage partnerships with specialized agencies and others to complement these efforts with integrated health, water, sanitation and hygiene and protection services, ensuring sustained access to safe and nutritious meals alongside essential services for children.
23. Building on systems and capacity developed under the Sudan Family Support Programme and the Sudan Emergency Safety Net Project, including a grievance redress mechanism, this work will support the restoration of essential services and strengthen system readiness, laying the foundation for future nationally and subnationally led safety nets and social protection systems. Focus areas include capacity strengthening for national and subnational actors through evidence generation and targeted technical assistance, complemented by multisectoral coordination, delivery chain strengthening and harmonized management of information and data on vulnerability.
24. A central pillar will be support for emerging social registry, data sharing and governance structures across United Nations and NGO partners with the aim of supporting common registration, de-duplication and referral systems, leveraging WFP's collaboration with the Ministry of Social Development, UNICEF, the World Bank and other key actors. Knowledge transfer, policy dialogue and advisory support will be advanced in collaboration with key partners such as UNICEF and the World Bank.
25. Country capacity and systems strengthening efforts will be incremental and based on continuous engagement and co-creation processes with local actors and key humanitarian and development partners. WFP will undertake a pragmatic transition from implementer to enabler, laying the foundations for sustainable, locally led solutions over time.
26. The cross-cutting priorities of environmental sustainability, protection, accountability and localization will be integrated throughout implementation. WFP will work with local institutions and organizations, including women-led enterprises and other value chain actors, to strengthen their capacity while promoting sustainable natural resource management and community participation. Conflict-sensitive and do-no-harm approaches will support equitable access to livelihood opportunities, assets and markets.

Interim country strategic plan outcome 4: Humanitarian and development partners in the Sudan, including local and community-based organizations, are better able to reach vulnerable people and respond to their needs throughout the year

27. Outcome 4 will enable collective humanitarian action through mandated and on-demand services, improving efficiency and cost-effectiveness and supporting a more coherent, accountable system-wide response that reaches affected populations in a timely manner. In line with United Nations reform efforts, WFP will implement the UN80 integrated supply chain model in the Sudan in order to enhance operational coherence, value for money and collective impact.
28. Under activity 4, the United Nations Humanitarian Air Service (UNHAS) will provide safe, reliable, neutral and cost-efficient air transport to facilitate humanitarian access where viable alternatives are unavailable. Subject to security conditions, access clearances and system-wide coordination, UNHAS will expand its services to priority locations including, among others, Damazine (Blue Nile), El Obeid (North Kordofan) and the Darfur states, while maintaining critical capacity to facilitate timely medical and security evacuation within the Sudan and across its borders.
29. In line with UN80 and the humanitarian reset, WFP will adopt the newly established global logistics and telecommunications cluster model in the Sudan. WFP will provide coordination, information management and common logistics services to humanitarian and local partners, thereby strengthening preparedness and response capacity (activity 5), and ensure critical connectivity and security communications, scaling up services in hard-to-reach areas and enabling humanitarian actors to operate effectively (activity 6).
30. Under activity 7 WFP will continue to provide on-demand services to humanitarian and development partners on a full-cost-recovery basis, supporting flexible and scalable operations that leverage WFP's comparative advantages. These services will include supply chain support such as fuel provision, warehousing and transportation, including temperature-controlled logistics infrastructure to ensure the timely and efficient delivery of health and nutrition commodities.
31. Through cash-based transfer delivery systems, WFP will collaborate with key partners to strengthen identity management, data interoperability and coordinated targeting, supporting de-duplication, accountability and more integrated assistance while safeguarding data protection and privacy.
32. To further enable collective humanitarian action, WFP will also support shared premises and common services, promoting more integrated, cost-effective and coherent operations. This will include accommodation booking through the United Nations Booking Hub, the leasing of light vehicles through UN Fleet and access to primary healthcare and emergency medical services, helping to maximize system-wide efficiency.
33. Cross-cutting priorities under this outcome will focus on protection, accountability to affected people, localization and national capacity strengthening. WFP will ensure that common services support safe, equitable and timely access to assistance for vulnerable populations while upholding humanitarian principles. Activities will incorporate partner and community feedback mechanisms and will be implemented in close collaboration with national and local actors in order to strengthen capacity and promote local ownership.

Prioritization approach

34. The ICSP adopts a hyper-prioritized approach, focusing assistance on populations at the greatest risk of famine and acute food and nutrition insecurity. Resources will be deliberately concentrated where they can save the most lives and achieve the greatest impact. WFP will retain operational flexibility, with targeting assumptions and priorities regularly reviewed and adjusted in response to evolving conditions.

35. WFP will use vulnerability-based targeting, informed by food security, nutrition and protection analyses, displacement trends, livelihood indicators and coping capacity. Populations facing catastrophic levels of food insecurity or malnutrition will be prioritized. Malnutrition prevention activities will complement general food assistance to ensure nutrition adequacy, targeting households in IPC phase 4 and above in famine and famine-risk areas, with malnutrition treatment services delivered in locations with intersectoral severity levels 4 and 5.
36. In the event of funding shortfalls, WFP will further prioritize by reducing the number of areas assisted or discontinuing lower priority programmes in coordination with partners. Digital identity management systems and regular privacy risk assessments will support accurate targeting, accountability and responsible data protection.

Transition strategies

37. WFP will maintain emergency response capacity throughout the ICSP period in order to address acute and emerging needs, with priority given to saving lives, preventing famine and sustaining assistance through national and local actors, including community-based organizations, particularly where systems have collapsed. Where possible WFP will work with local partners to strengthen their capacity, involving them in decision-making processes.
38. As conditions permit, WFP will gradually shift from unconditional assistance towards resilience interventions and nationally led social protection systems; this will be done in coordination with partners in order to maintain continuity of support. Progress will depend on security and access conditions, the availability of adequate and predictable funding, partner capacity and government engagement. Decisions on transition or scale-down will be based on operational realities and accompanied by safeguards to ensure continued support and protection for populations at greatest risk.

ANNEX I

Summary line of sight of the Sudan interim country strategic plan

TABLE 1: SUMMARY LINE OF SIGHT OF THE SUDAN INTERIM COUNTRY STRATEGIC PLAN

Focus area	Crisis response	Resilience building	Resilience building	Crisis response
ICSP outcome	ICSP outcome 1: Crisis-affected people across the Sudan have access to life-saving food and nutrition assistance and are supported by strengthened national capacity to anticipate, withstand and respond to shocks by 2029.	ICSP outcome 2: Food-insecure and shock-affected communities in targeted areas have improved livelihoods and better access to healthy diets, thereby reducing humanitarian needs by 2029.	ICSP outcome 3: National and subnational actors – especially community-based organizations, non-governmental organizations and the private sector – have strengthened capacity to deliver school-based programmes and safety nets by 2029.	ICSP outcome 4: Humanitarian and development partners in the Sudan, including local and community-based organizations, are better able to reach vulnerable people and respond to their needs throughout the year.
Activity	Activity 1: Deliver an integrated package of life-saving food and nutrition assistance to crisis-affected people, and strengthen national capacity in early warning, anticipatory action and macro-level risk financing solutions.	Activity 2: Provide an integrated, nutrition-sensitive package of resilience activities – including nutrition support, livelihood support, asset creation, ecosystem rehabilitation and market access support – to targeted groups.	Activity 3: Provide national and local actors with support in relation to school meals, safety nets and capacity strengthening, enabling them to deliver integrated school-based programmes and safety nets.	Activity 4: Provide aviation services for passengers, light cargo and evacuations and technical assistance to the humanitarian community and other partners.
				Activity 5: Provide mandated logistics, coordination and information management services to the humanitarian and local partners through the logistics cluster.
				Activity 6: Provide mandated technology services to the humanitarian and development actors, partners and communities through the emergency telecommunications cluster.
				Activity 7: Provide on-demand services and expertise, including supply chain and cash delivery systems, to humanitarian and development partners.

ANNEX IV

Monitoring, evaluation, evidence and risk management

Evidence informing this interim country strategic plan

1. **Evidence:** The evaluation of WFP's corporate emergency response to the Sudan regional crisis from 2023 to 2025 underscored the need to strengthen organizational agility, operational readiness and surge capacity in order to enable timely, coordinated and effective responses in rapidly evolving emergency situations. It also found that dilemmas regarding humanitarian principles required stronger corporate guidance and escalation mechanisms.
 - **ICSP design response:** In response to these observations, WFP will strengthen rapid assessments and market analysis, institutionalize preparedness and scenario planning, enhance surge staffing and skills deployment and reinforce support for principled humanitarian decision-making, including coordination and escalation pathways.
2. **Evidence:** The evaluation referred to above also highlighted that protection, disability inclusion, accountability to affected people and the targeting of vulnerable populations were not consistently integrated into programme design and implementation, increasing the risk of exclusion from assistance.
 - **ICSP design response:** The ICSP mainstreams protection, disability inclusion and accountability across programme design, implementation and monitoring while strengthening collaboration with partners in order to reduce exclusion risks.
3. **Evidence:** The evaluation further observed that administrative and financial barriers constrained meaningful localization and engagement with local actors, while programming devoted insufficient attention to recovery, resilience and durable solutions.
 - **ICSP design response:** The ICSP includes measures to strengthen engagement and risk-sharing with local actors and integrate context-specific recovery, resilience and transition pathways into programme planning.
4. **Evidence:** The evaluation of the CSP for the Sudan for 2019–2023 found that nutrition outcomes were strongest when nutrition-specific interventions were combined with nutrition-sensitive and multisectoral approaches and that sustainable reductions in malnutrition required that underlying causes be addressed in a manner that went beyond treatment alone.
 - **ICSP design response:** Under the ICSP, WFP will strengthen nutrition-sensitive programming, integrate treatment and prevention activities into long-term multisectoral approaches and promote context-specific packages that combine nutrition, food security and resilience interventions.

Monitoring, evaluation and evidence generation arrangements

5. In line with WFP's minimum monitoring requirements, a risk-based monitoring and evaluation system will underpin implementation of the ICSP throughout its three-year duration. Routine and outcome monitoring, evaluations and periodic reviews will generate evidence to support management assurance, decision-making, adaptive programming and accountability to affected people, donors and partners. Remote and third-party monitoring will complement direct monitoring, particularly in hard-to-reach and access-constrained areas, while digital data collection and strengthened issue escalation and case management systems will improve oversight, data quality and the timely resolution of implementation, compliance and performance issues.

6. A multi-channel community feedback mechanism will provide an additional layer of assurance by ensuring that community perspectives inform management action and programme adjustments. WFP collaboration with cooperating and knowledge partners, including local research institutions and other United Nations entities, will support outcome measurement, joint monitoring and learning. An independent ICSP evaluation is planned for 2028, complemented by a decentralized evaluation of support for national safety nets, an evaluation of the impact of resilience programming, and targeted studies and learning reviews to support evidence-based decision-making.

Risk management and mitigation measures

7. Shortfalls and reduced predictability of funding may constrain operational continuity and responsiveness; actions to mitigate this include funding diversification, the use of innovative financing and multi-year planning. Constraints arising from movement and access restrictions may limit delivery in critical areas; actions to mitigate this include negotiations, humanitarian notification and deconfliction arrangements, engagement with relevant authorities and partners and third-party monitoring to support operational continuity. Risks linked to conflict dynamics, attacks on humanitarian personnel and facilities and violations of international humanitarian law will be managed through enhanced risk analysis, scenario planning, conflict-sensitive programming and security coordination.
8. The risk of supply chain disruptions will be mitigated through corridor diversification, advance planning and strategic pre-positioning. Fiduciary risks will be managed through reinforced oversight, accountability, stakeholder engagement, risk information-sharing, monitoring and community feedback mechanisms, along with continuous review of internal controls. Measures related to protection from sexual exploitation and abuse will be enforced and systematically integrated into operations and partnerships.
9. WFP will apply a risk-based approach to programming and decision-making, maintaining the flexibility to adapt and scale operations in response to evolving conditions while mitigating strategic and operational risks. Duty of care will remain a priority, addressed through regular risk assessments and adequate resources for staff safety and well-being measures.
