- Regional and in-country storage and transport network
- Telecommunications infrastructure through the ET Cluster
- Rapid procurement and response through UNHRD
- Engineering support to health facilities
- Emergency preparedness and response measures

WFP and WHO: the new partnership

WHY:

Two primary objectives:

- Ensure the financial, administrative, communications, procurement, and security support required to enable WHO technical teams to be present and operational at the district and county level;
- Learning opportunity to reinforce operational capacities of the agencies to respond to complex health crises in the future.

WHAT:

Provision of operational support to WHO technical field teams at the national, sub-national and field level in the three countries through a scaled-approach in priority areas determined by WHO and governments.

HOW:

Building teams together with WHO at the national and district level.

Real-time review of risks, opportunities

NOVEMBER - DECEMBER

DECEMBER - JANUARY

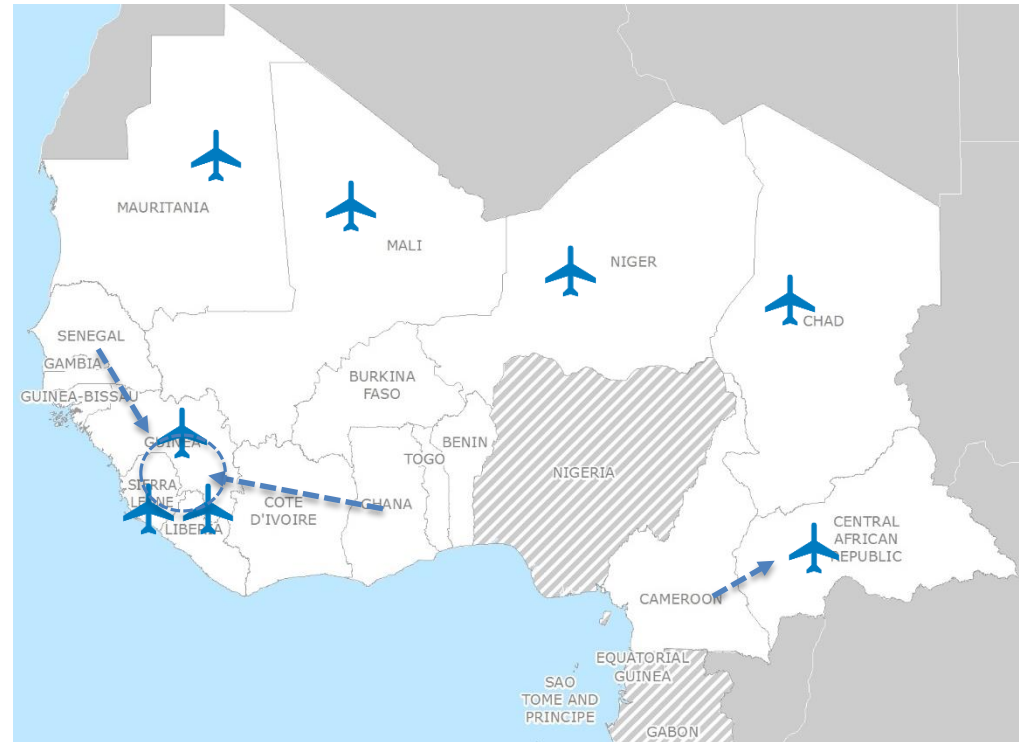

FEBRUARY

Compliance team based in Dakar, travelling to Accra and 3 COs

Common Services Spotlight: UNHAS

- Regular flights between the ebola affected countries
- Regular flights connecting the region to C.A.R.
- Ad-hoc cross-border flights (11 in 2014)

Linking School Meals and Local Production

Nutrition : Beyond Treatment

*The 2008 Lancet Series on Maternal and Child Undernutrition identified 10 evidence-based direct nutrition interventions which if taken to scale with 90% coverage in high burden countries **would reduce stunting by 20%**. The interventions aim to promote appropriate feeding and nutrient intake during the critical 1,000 period and treat acute malnutrition.*

Data collection
