Protection and Accountability

Operationalising the Centrality of Protection

Simplify the concept and make **relevant** the application of protection

Demonstrate the integration of the Policy with the **multi-lateral protection** system

Leadership prioritisation of protection

Diversification of employee profiles

Strengthened context analysis to improve **targeting** and **engagement** with, and **learning** from, affected populations and local actors

Participatory Policy Development

Affected populations **led the conversation**, which was supported by other stakeholders including: local authorities, inter-agency coordination fora (national, global), Executive Board

Learning: Engage **locally** and with a wide range of stakeholders regularly to understand existing or emerging dynamics; ensure **diversification** of information sources and **triangulation of data**

Policy Implementation and Resourcing

1. Leadership & Institutional: Strategic Plan ensures the financial, human and technical resources for **organisational accountability**
2. Planning and Programming: Integration of policy norms and standards into **programming frameworks**
3. Capacity Development: Ensuring the **value add, relevance, application** of protection across all units, functions and levels
4. Partnerships & Accountability: Leveraging **actors of change**
5. Advocacy & Comms: **Amplifying** the voices of affected persons

Thank you
