STRUCTURAL STRESSORS SHOCKS Underlying vulnerabilities Multiple and deeper Bigger and more frequent ARMED CONFLICT DISPLACEMENT FINANCIA SPORT WW STRUCTURA COMO. NATURAL DISASTERS STRESSORS SHOCKS

Local procurement

Locally sourced commodities injects financial resources in the **local economy**, stimulating markets, as well as value and supply chains.

In addition, such locally sourced food assistance supports the livelihoods of local farmers.

Nutrition sensitive

Nutrition sensitive food assistance accounts for the differentiated nutritional requirements of populations, notably children and PLG/W.

Beyond immediate assistance, nutritional counselling also durably contributes to **human capital development.**

CBT

Beyond meeting food, nutrition and essential needs, **CBT- interventions** also stimulate local economies.

In addition, CBT can support **financial inclusion** and, through mobile money, incentivizes the private sector to bring **connectivity & services to rural areas.**

Social Protection

Channeling assistance through shock-responsive social protection strengthens national institutions & systems (including through vertical/horizontal expansion).

It also links beneficiaries to durable safety nets as well as complementary programmes and social services.

Note: This a non-exhaustive list of examples where WFP emergency assistance can contribute to 'changing lives' while 'saving lives'

INTERMEDIATE OUTCOMES

GOALS Bv 2026

OUTPUTS

CHANGE PATHWAYS

3. IMPROVING

LIVELIHOOD

& RISK MANAGEMENT

- Transfers delivered (food, cash, services, equipment)
- Training & SBC conducted Transfers delivered (food, cash, services, equipment)
- Nutrition interventions delivered
- Access to basic & financial services facilitated
- School health & nutrition packages delivered
- Access to equipment, inputs & energy facilitated
- Assets restored & created (land & water)
- Risk transfer, reduction & mitigation measures delivered
- Procurement localized & markets/value chains supported
- Training conducted (livelihoods, resilience, risk mgt)
- Technical expertise & advice provided
- Systems design & operations supported
- Evidence generation, analysis & use enhanced
- Resource mobilization pursued (external & domestic)
- Policies & legislation development facilitated
- Supply chain, telecommunications & aviation delivered
 - Cluster mechanisms coordinated
- Data & analytics provided
- Digital service delivery solutions deployed
 - Administrative & infrastructure support provided
 - Global policy debates influenced
 - Evidence generated & communicated
 - Humanitarian diplomacy & peace advocacy conducted
 - Global partnerships strengthened

PEOPLE & COMMUNITIES

People have increased access to nutritious food, cash & services

IMMEDIATE OUTCOMES

- · People consume sustainable & healthy diets
- School-age children have increased access to school, health & nutrition packages
- Urban & rural poor have increased income, skills & capacities
- Safety, dignity & integrity of people are protected
- Gender equality is enhanced & women are empowered
- Smallholders are more productive, reduce PHL & better access to markets
- Community-based systems are strengthened
- · Ecosystems are regenerated
- Local economies & value chains are stimulated

NATIONAL ACTORS & SYSTEMS

- Policies & legislation promote food security & healthy diets
- Funding is increased, flexible & sustainable
- Country system components are strengthened:
- Emergency preparedness & response systems
- o Food systems
- Supply chain systems
- Social protection systems
- National programmes:
- · Are better designed to promote food security & nutrition
- · Are able to mitigate the impact of shocks & stressors
- o Increase their coverage & inclusiveness

COORDINATION & PARTNERSHIPS

- Evidence & data are leveraged for operations & advocacy
- Global & country-level partnerships are strengthened
- Humanitarian & development systems are more efficient & coordinated
- Integrated & joint programming addresses the triple nexus
- Innovative/digital solutions are deployed

People are better able to meet their food & essential needs

People have better nutrition, health & education outcomes

> People have improved livelihoods

People build resilience to shocks & stressors

National actors' capacity is strengthened

Country systems are more efficient, high quality & resilient to shocks

WFP & partners' interventions are integrated & effectively supported

SDG2 remains at the top of national & global agendas The world is on track towards sustainable food security & nutrition

The world has

People are more resilient, empowered & better able to meet their essential needs

Countries have strengthened systems & capacity to implement the SDGs

National & global actors are collaborating more effectively towards the SDGs
