Not available	182	32	150

¹ Some activities within the 2020 COMET system for NGO partner collaboration have been grouped to align with current activity categories. New activity categories have been created in 2020.

² In order to portray a more complete snapshot of collaboration carried out in 2020, not only with NGOs, but also with members of the International Red Cross and Red Crescent Movement, these partnerships have been incorporated into the above indicative figures under the generic term of "partner".

³ Some service categories within the 2020 COMET system for NGO partner collaboration have been mapped and adjusted to align with current service categories. The "Distribution" category has been renamed "Implementation" to match with 2020 COMET data.

Notes:

- i). In 2020, WFP worked with approximately 746 NGO and Red Cross and Red Crescent partners. The number of partners displayed in the tables above cannot be added to result in the total sum because individual partners may collaborate with WFP in a variety of programme activities/provide various services, therefore creating overlap.
- ii). The number of partners reflected in any given cell is indicative only of the total count of distinct partner organizations and does not demonstrate the scope of the partners' collaboration.
