Management response to the recommendations in the summary report on the evaluation of the country strategic plan for Somalia for 2022–2025

Background

This document presents WFP management's response to the recommendations in the summary report on the evaluation of the country strategic plan (CSP) for Somalia for 2022–2025. The evaluation covered CSP activities implemented between 2022 and 2025. Taking a utilization-focused and consultative approach, the evaluation served the dual purpose of accountability and learning and informed the preparation of a new CSP.

The evaluation made five recommendations, of which four are strategic and one, operational. This management response sets out whether WFP agrees, partially agrees or disagrees with the evaluation recommendations and sub-recommendations and presents the planned (or completed) actions, responsibilities and timelines for their implementation.

Focal point:

Mr E. Daloum
